Canada Lifts Ban on Increase In Natural-Gas Sales to U.S.

By Dusko Doder

OTTAWA, Jan. 18 (WP).—The Canadian government agreed yesterday to lift its seven-yearold embargo on increased sales natural gas to the United States, clearing the way for a 50-per-cent expansion of U.S. purchases from its major sup-

In return-under an agreement reached by Vice-President Mondale and Prime Minister Pierre Elliott Trudeau—the U.S. government promised to make proposals for reducing taniffs on reports from Canada, to help this country's troubled economy. The details of the U.S. concessions were not disclosed but senior Canadian officials express-

ed satisfaction with the package offered by Mr. Mondale.
At present, the United States imports 1 billion cubic feet of Canadian gas daily, about 5 per cent of U.S. consumption. U.S. industry officials had been talking about increasing daily imports by 500 million to 600 million cubic feet, to fill the requir-ed needs of the Northern states, if the embargo were lifted.

Price Negotiations There was no discussion yesterday of a price structure, which must be negotiated by ing with his party's line aimed at broad demogratic unity.

that Mr. Banes would begin the process of officially asking Mr. Sources to head a new government tonight. It was issued after Mr. Eanes was endorsed by military's Revolutionary Council. The statement said that the President would meet tomorrow with representatives of those parties with seets in par-

"The President has accepted the Socialist-conservative formula and will today open the formalities to initiate this," the state-

ment said. Mr. Soares told the President that his party was willing to form a new government with members of the conservative Center Democrats serving in the cabinet. The Socialist leader said that he planned to sign a formal agreement with the conservatives tomorrow.

The agreement would meet a presidential demand that the new cabinet hold a parliamentary majority, although Mr. Eanes earlier had hoped that Mr. Source would be able to include at least the tacit support of the Commun-

Once officially named to form a government, Mr. Soares will have 10 days to choose a cabinet and governmental program to present to the Legislative Assembly for approval. Politicians said that a favorable vote was certain because the two parties hold a 143-seat majority in the 263member assembly. The Communists quickly crit-

icized the alliance. "The coalition will lead to a serious deterioration of the economy and endanger Portugal's democracy. a party spokesman said. ch a contition comes about, it will generate the just repudia-

tion of Portuguese Workers." Portugal has been without a government since Mr. Soares's minority Socialist government fell in a no-confidence vote on

ists envisioned giving the conservatives three portfolios in the cabinet and about six recretaryof-state positions. The decision to proceed with on-

ly conservative support represented a sharp departure from the Socialist position that the party needed Communist support to insure stability.

European Tribunal Denies Prisoners Were 'Tortured'

Human-Rights Court Condemn's U.K. 'Inhuman' Acts in Ulster

By James A. Brown

PARIS, Jan. 18 (IHT).—The Surepean Court of Human Rights oday condemned Britain for nan and degrading treatment" of prisoners in Northern reland in violation of Article 3 if the European Convention on

Hunan Rights. But the court in Strasbourg ejected the unanimous decision if the European Human Rights commission that the interrogadon techniques used on the pris-mers constituted "torture."

With that exception, the court upheld the findings of the commission, which is the tribunal's watchdog and investigative body in connection with violations of

the rights charter. The commission had found and the British government later admitted before the court, that torure, as defined and prohibited under Article 3, was involved in five British "interrogation" techniques—forcing prisoners to stand against a wall for prolo ed periods blinding them with hoods, deafening them with noise and denying them food and

Definition of Torture But the court today ruled that the use of those techniques, while a serious breach of the rights convention, did not amount to torture under the meaning of the Article 3, which says simply: "No one shall be subjected to torture or inhuman or degrading

treatment or punishment." The court held that this wording was designed to distinguish torture as aggravated ill-treatment causing a greater intensity of pain than that inflicted by the five "inhuman and degrad-

ing" techniques. Today's ruling, the first by the 19-year-old court in a case based on charges brought by one government against another, criticized Britain for not cooperating fully in the lengthy investigation of the many charges filed against it by the Irish Republic in 1971.

It was also the first time that

an international authority has

wrongdoing in Ireland. The court's 17 judges are drawn from the 20 members of the Council of Europe. Its rulings are bind-ing on all states that have ratified the European human-rights

The court today refused to unhold the Irish government's demand that those responsible for the charter's violations and superiors who ordered these practices be tried under English law or undergo disciplinary action. It also refused to order Britain to pay damages to the hundreds of victims of its security forces. In its 200-page decision, read in

open session by court president Palladore Pallieri of Italy, the tribunal further stated that the imprisonments were not a violation of the rights charter. It said that the interpment powers invoked by Britain were justified under the charter provision that allows for the suspension of certain rights in an emergency. The court also rejected Ireland's charge that Britain had gone for special powers in the given Ireland's Plea

ed the court to overturn the findings of the commission, expand the scope of the case and deliver a wide-ranging condemnation of the actions of British security forces in Northern Ireland. In five years of legal wrangl-

ernment in London refused to submit written evidence, adopted delaying tacties and at one point was reprimanded by the commission for violating the panel's procedures by providing security officers with written records of testimony by witnesses for the Irish government before those

News Analysis

Italy Lobby Bids U.S. Comment on Rome Crisis

By Bernard D. Nossiter

ROME, Jan. 18 (WP) -The firm U.S. opposition to Communists in a new Italian government, according to authoritative diplomatic sources here, was the result of personal pleas by influential leaders on Capitol Hill plus concern for the staunchly anti-Communist sentiments of organized Italian-American

The public expression of U.S. views on Italy's government last week drew criticism from Communists and Socialists here, But more surprising is the dismay voiced by Italian political moderates, who generally support Washington.

Among the U.S. politicians who are known to have urged the administration to voice strong and public opposition to Communists in the Italian government are Sen. Edward Brooke R-Mass., a member of the Senate Subcommittee on Foreign Operations.

Ambassador Richard Gardner. who was called home last week to discuss the Italian crisis, also is known to have spoken with Sen. Frank Church, D-Idaho, of the Foreign Relations Committee and Rep. Peter Rodino, D-N.J., a leading House figure and important spokesman for the estimated 25 million Italian-Amer-

Communist Demands

The Christian Democratic government of Premier Giulio Andreotti resigned Monday after the Communists, the second biggest party, withdrew their support and formally demanded minis-

According to those in a position to know, the U.S. decision to urge publicly that Mr. Anresist the Communist demand was based on a fear that elder statesmen among the Christian Democrats were leaning toward a deal with the Communists. Diplomats cite ambiguous speeches by Aldo Moro, a former premier and now pres-

Amintore Paniani, another former premier, as the source of this

U.S. authorities are skeptical of the conventional Italian view that Italian Eurocommunists are markedly different from the Moscow-oriented variety. Visitors here are quoting an extract from an interview on Dec. 30 with Luigi Longo, the 77-year-old president of the Italian party. He told the Milan newspaper,

Corriere della Sera: "The Russian Revolution has been the greatest work that has ever been done. It is a propulsive, democratic and progressive force not only for the Soviet pation but also with regard to the situation in the world. Can you imagine what the situation in the world would be, supposing that this great economic, political, military, yes. also military, and ideological force no longer existed?"

U.S. authorities believe that last week's statement has stiffened the Christian Democrats and assured that they will resist giving the Communists any ministry. These officials believe the Communists have now been frightened, too, and are pulling back from their demand for government places.

The U.S. point of view holds that some lesser Christian Democratic gesture to give the Communists a greater degree of legitmacy would be acceptable provided that a new Christian Democratic government in turn exfrom the Communists p.edges of support for specific austerity measures.

Almost everyone here agrees that Italy is now ungovernable without the consent of the Communists and their worker followers, particularly at a time of raging inflation.

The real fear of Italy's Republican leaders is that Washington's cold shoulder could lead to a "stiffening of positions" among the Communists, strengthening old hard-liners like Mr. Longo

ident of the party, as well as behaved more moderately, like the party secretary, Enrico Ber-

There is little doubt here that the United States enjoys an unusually large influence over Italy's fate. Even now, it was learned, top officials are working on a set of recommendations for an International Monetary Fund watchdog team due here after a n w government is formed. Whether or not Italy gets the IMF team's approval will have a profound effect on Italian out-

U.S. Views at 1MF The United States can not dictate to the team. But as the biggest member of the organization, n. IMF team can afford to ignore

The officials understood to be working on the recommendations for the IMF are Treasury Secretary Michael Blumenthal, Under Secretary Anthony Solomon, Assistant Secretary of State for International Affairs Fred Bergsten and diplomats in the U.S.

What the watchdog team de-ckes is a matter of both political and economic judgment, not simple arithmetic. Italy's reserves of foreign currency are now so large it does not need any more of a \$500-million loan it negotiated with the fund. But to get that credit, Rome pledged that its budget deficit would not

The fallen Andreotti govern-ment forecast that its deficit would run \$22 billion this year. Moreover, if any new government does not get Communist support to cut public spending and raise charges for public utilities, the deficit will run an estimated \$33 billion, twice the IMP limit.

The IMP and Washington are understood to look with a tolerant eye on the \$22-billion deficit. understanding that there are poltiical limits to Italy's beit-tighte..ing. Mr. Andreotti is known to have pointed this out forcefully to Ambassador Gardner here. If however, the IMF team dis-

Severe Law Fails to Deter

Amphetamine Abuse Increases in Japan

TOKYO, Jan. 18 (AP).-More and more Japanese, known for long hours and hard work, are resorting to amphetamines to get through the day, despite penalties of up to life in prison, the National Police Agency says.

"It used to be just night workers—taxi drivers, truck drivers nightclub hostesses," said Super-intendent Yoshitake Shimada of the agency's safety division. But farmers, construction workers, housewives, salesmen, and businessmen are using them, officials

An agency report issued last month said that arrests for amphetamine use, sale or smuggling have gone up 20 times in the last

those involving heroin, opium, marijuana or other illegal drugs have increased only slightly or decreased. The report said that amphetamine cases rose from fewer than 1,000 in 1969 to 14,000 by 1973, when a law providing for life imprisonment for selling the drug was passed. Arrests de-creased to just under 10,000 the

next year, but have climbed more

than 30 per cent a year since.

Inspector Yasuo Sasaki of the Kanagawa prefecture, which includes the two major ports of Yokohama and Yokosuka, estimates that there are at least 150,000 amphetamine users in Japan. "It's easy to get, easy to use . . . and it fits the Japanese character," he said. Mr. Sasaki explained that heroin and related 11 months of last year-while an extra stigma. "You become a Some employers even encourage

Instead, Mr. Begin addressed himself to the two major points of difference—the future borders of Israel and Palestinian self-

determination.

"Peace cannot be established it Israel were to restore its former aggression-provoking lines of June 5, 1967," Mr. Begin said. Peace cannot be established with the division of Jerusalem. which is part of the cultural heritage of the Jewish people."

The Egyptian foreign minister. seated to Mr. Begin's right, covered his face with his hands and fidgeted as the Israeli leader spoke. When he was introduced, he unsmilingly rose and said:

"I thought that after the first part of the day we were going to have a relaxed and social event tonight. The Prime Minister chose to bring his work again. I can only repeat, we believe the basic element of a lasting peace is the element that I stated very clearly in my address today.

"As to the Prime Minister's views, I think the place to discuss it is in the coming meeting. I'll keep my ideas until then Thank you very much," Mr. Kamel said, sitting down without

Bolivian Police Arrest Strikers

LA PAZ, Jan. 18 (AP) Bolivia's military regime arrested about 100 civil rights activists on a hunger strike yesterday and a number of political leaders but an anti-government strike began in the country's tin mines and hunger stikes continued at other

It appeared to be the most serious situation faced by the government of Gen Hugo Banzer since it took power in August. 1971. It also darkened hope for a return to democracy through elections promised for July, the first in 12 years.

The raids occurred at aix sites in La Paz. Police, backed by armed civilians, seized the strikers, who are protesting restrictions on civil liberties, the failing of political prisoners and the lack of freedom for tin-mining unions Hunger strikes continued at four Roman Catholic churches in the capital

linguer.

put, employment and income.

assy here.

run higher than \$17 billion.

amphetamines have the opposite effect—temporarily, they help you to work harder. "But they're worse than heroin." Sasaki said. "People under the influence of heroin don't fight. But amphetamine addicts get hallucinations, delusions and be-

come violent." Mr. Shimada agreed, "We had 21 cases involving 26 persons last year where someone was killed —without any reason. We had 11 arson cases and 8 kidnappings involving amphetamines," he said.

Japanese police have no real explanation for the increasing use of amphetamines-although they note that businessmen and workers are under more pressure because of the recent recession. the use of amphetamines, especially by truck drivers and night workers, Mr. Shimada said.

Mr. Shimada and Mr. Sasaki said that organized crime is push-ing the drugs. "The Yakuza [organized criminal gangs] are trying hard to expand the market," Mr. Shimada sald. "When we cracked down on heroin in the early '60s, they switched to stimulants. It's more profitable than gambling."

He said that the drug usually is made in South Korea or Europe and smuggled in by way of Macao. Hong Kong or Taiwan. A gram of amphetamine costs 2 1/2 cents in West Germany, Mr. Shimada said, "It sells for 3 to 4 in Hong Kong. It wholesales for 20 to 25 in Japan and it sells on the street for \$1.25 to \$2, sometimes even \$8 or \$10," he added.

Mr. Shimada said that organized criminal gangs in Japan now get 60 per cent of their money from amphetamines. "It's legal in Macao. There's a big pharmaceutical company there that buys huge amounts, which Japanese police believe is nearly all sent to Japan, since there is little amphetamine use elsewhere in Asia," he said.

In Hong Kong, there was no law against smuggling the drug out of the country until last year. Mr. Shimada added that at least one Hong Kong policemen is under indictment in Japan for amphetamine smuggling but has not been arrested in Hong Kong because he broke no local law.

Mr. Sasaki said that pushers never inform on their bosses. Also, he said, Japanese police are limited in the use of undercover agents by entrapment laws.

But the main problem, according to Mr. Sasaki, is that normally law-abiding Japanese are not cooperating. "The users are Japanese people-housewives, businessmen. How can we stop them?" he asked.

Brezhnev Bonn Trip Delayed: Health Cited

BONN, Jan. 18 (UPI).—Soviet leader Leonid Brezhnev informed Chancellor Helmut Schmidt yesterday that his health prevents him from visiting West Germany next month, government spokesman Klaus Boelling said today. Mr. Brezhnev said that his doctors have ordered him to take care of his health because of his recent case of the flu. Mr. Brezhnev had been scheduled to

visit Bonn Feb. 16-19, Mr. Boel-

ling said. A new date for the

trip has not been set.

approves of the conduct of a new Italian government. Italy could lose \$7 billion hat foreign banks have on deposit here; it could have trouble extending the \$5 billion in debt it is scheduled to repay, and suffer a drastic fall That in turn would increase the

prices of all the things Italy imports, worsening an inflation that is running about 16 per cent a year. Indeed, it could touch off a spiral of deepening inflation because wages here are tied to the consumer price index. But that is not expected to

happen. The Communists are believed willing to settle for some-Uling less than cabinet posts. That could clear the way for Washington and IMF approval of a budget that breaks the pledge to the fund.

The big question here is whether the Christian Democrats will give the Communists enough legitimacy-short of a cabinet rele-to extract from the Communists a stiff enough agreement on some austerity measures

> In Best-Selling Spain Book conflict and its fealty to Stalin. Mr. Semprun's intensely emotional attack on Mr. Carrillo, the

party and Stalin opens wounds, memories and a history that most Spanish Communists would like to forget.
For them, it was as if the party was born anew in April when it was legalized and when it acquired a new philosophy with the publication of Mr. Carrillo's "Eurocommunism and the State,"

a theoretical work that aroused

Moscow's wrath. What gives Mr. Semprum's book force is that he is no ordinary writer. He wrote the screenplay for "Z" and other award-winning leftist movies. He writes in Spanish as well as French and his novels have won prizes in Spain and in France. But for years particularly in the 1950s-he entered and left Spain, where he headed the Communist underground, as Federico Sanchez, his party identity.

French Exile

He joined the party as a teenager while in exile in France, fought in the French Resistance during World War II and was captured and interned in Buchenwald. These credentials, apart from his literary ability and position in the party, give his book special political significance. Mr. Carrillo declined to comment on the book when questioned. I will not give it any pub-

licity," he said. Still, the party's weekly news-paper, Mundo Obrero, in its latest issue, admits that the book will hurt the party because of the calumnies it contains. And the party's chief theoretician, Manuel Azcarate, has published a rebuttal of Mr. Semprun's recollections. What appears to hurt the Com-munist party's chiefs most is Mr. Semprun's accusation that Mr Carrillo virtually sent Communist underground leader Julian Gri-mau to his death when Mr. Carrillo made Mr. Grimau the top Communist leader in Spain. Mr. Grimau was captured by

Franco's police and executed in 1963 despite pleas for clemency from all over the world. He became a martyr to world leftists. Mr. Semprun recalls that he had warned Mr. Carrillo that Mr. Grimau was unfit for the task because Mr. Grimau was careless and took too many risks. But what spelled death for Mr. Grimau, says Mr. Semprun, was that he had worked for the police of the republic that Franco defeated in the civil war.

Freelance Communist

The author said in a telephone interview from Parls that he considers himself "a freelance Communist" and "hopes that his book will help to open the party to democratic leadership and de-

He blames Mr. Carrillo for a complete misunderstanding of what was happening in Franco's Spain as a result of economic progress in the early 1960s. His suggestion of a new line for the party -close to the Eurocommunism espoused by Mr. Carrillo today was the cause for his ouster in a party meeting in Prague in

(Continued from Page 1) which would be paid with public funds. The group's plan would include a director and a counsel, plus a clerical staff. AARO proposes that the director be appointed jointly by the Senate majority leader and the speaker of the House. The counsel would be named by the Senate and House minority leaders. The appointments, the group says, "would be made from a panel of candidates submitted by the principal overseas affiliates of the Democratic and Republican National Committees after they had consulted with other important American groups abroad."

The group recommends 'a modest travel budget" to enable staff members to make "one or more trips abroad each year to work with the major groups of

overseas citizens." The group said that it appears that a congressional liaison office for Americans living abroad could be created by a joint resolution

Cross interpreters on his arrival at Seattle-Tacoma airport. He is in the United States to donate a kidney to his brother, Andrew Chan, of Yakima, Wash., whom he had not seen in nearly 25 years. The Red Cross, in both Yakima and Peking, helped to arrange the visit, which was cleared by the State Department.

Ousted Communist Aide Criticizes Carrillo

By Miguel Acoca

MADRID, Jan. 18 (WP).-The image of Communist party leader Santiago Carrillo as a tolerant anti-Soviet Eurocommunist champion is suddenly losing its gloss here because of a best-selling Spanish book charging Mr. Car-rillo with ruthless Stalinist domination of the party when it was a persecuted underground organization conspiring to topple Franco.

There is no doubt that Mr. Carrillo and the party's leadership have been shaken by the allegations in the acidly critical "Autobiography of Federico Sanchez by Spanish novelist and screenwriter Jorge Semprun, who was ousted by Mr. Carrillo in 1964 from the party's executive com-

For months the Spanish Communists have been enjoying the triumphs of acceptance in Spain and in the West, including the United States, because of their brand of Eurocommunism under which most of the parties in Western Europe have taken an independent line from the Soviet Union on key issues.

Mr. Carrillo's standing has become so high, in fact, that he has been received by King Juan Carlos. Last fall he lectured at several leading universities in the United States. He was the first Western European Communist leader to be given a U.S. visa under new immigration regulations.

Past Roles

Until Mr. Semprun's book hit the test-seller list, it was as if neither Mr. Carrillo nor the Spanish Communist party had a past closely linked to the Soviet Union. The party's role in the 1936-1939 civil war was buried and so was its liquidation other leftist forces during the

Videla, Pinochet To Meet Today On Land Dispute

BUENOS AIRES, Jan. 18 (AP). -Presidents Jorge Videla of Argentine and Augusto Pinochet of Chile will meet tomorrow to try to settle a territorial dispute that has prompted troop buildups by their military governments, a reliable source said last night.

It said that the two men would meet at an Argentine air base in Mendoza, 1,200 kilometers west of here, to resume negotiations broken off by their foreign ministers last month. Gen. Pinochet suggested the meeting last week.

Both countries claim three small islands in the Beagle Channel near Cape Horn and an eco-nomic zone in the Atlantic Ocean 320 kilometers east and south of them. The islands were awarded to Chile in an arbitration ruling by Britain, but Argentina has threatened to reject it in order to keep Chile out of the Atlantic. The foreign ministers of the two countries held talks late last month in an effort to reach a compromise before the Feb. 2

deadline for Argentina's reply to Britain. The talks failed and both countries reportedly began reinforcing their garrisons in the south. Argentina also sent 21 warships on maneuvers in the south Atlantic.

L.A. Ex-Police Chief Seeks Governorship

LOS ANGELES, Jan. 18 (Reuters).—The colorful, newly retired Los Angeles police chief, Ed Cavis, announced yesterday that he will seek the Republican nomination for governor of California. Mr. Davis, 6L, who once ad-

vocated hanging hijackers at airports, said that he regarded the present California governor, Democrat Edmund Brown jr., as lacking administrative ability. Mr. Davis stepped down from his police chief job Monday after holding it for eight years.

Heathrow Fogged In

LONDON, Jan. 18 (AP).-Dense fog made it impossible to land at Heathrow and other London airports today and there were only a few departures, airport officials said. Many transatiantic flights were diverted to Amsterdam, Shannon in Ireland, Manchester and Prestwick in Scotland.

Claudin, a Communist theoreti-cian who has refused to take sides with Mr. Semprun in the present party dispute.

For Mr. Semprun-as well as for other intellectual Communists who left the Spanish party in the 1960s-Mr. Carrillo represents the Stalinist tradition that puts the party above all.

Mr. Carrillo and other party leaders are aware of demands for open discussion within the party. V7hether they intend to allow criticism will become known at the party congress next spring.

Of Gold Cited In Saudi Arabia

BEIRU,T, Jan. 18 (Reuters). - A London-based mining group has found significent gold deposits in Saudi Arabia, a Middle East news digest reported today. The value of the deposits has not been determined.

The Middle East Reporter said that Consolidated Gold Field, Ltd., made the discovery 170 miles northeast of Jeddah using photographs taken by cameras in satel-

WASHINGTON, Jan. 18.-J.

Edgar Hoover criticized FBI subordinates early in 1964 for "hedging and equivocating" in their reports to the Warren Commission about contacts between the bureau and Jack Ruby before the assassination of President John P. Kennedy in the preceding No-

By Norman Kempster

Hoover's handwritten notation on an internal FBI memorandum adds a new dimension to what has been disclosed in the last 14 years concerning friction between the bureau and the commission that investigated Kennedy's mur-

Documents made public several years ago showed that the FBI volunteered little information to the commission about its relations with Ruby, the convicted killer of Lee Harvey Oswald. The commission ultimately concluded that Oswald acted alone in his assassination of Kennedy in Dallas.

Recruited as Informant According to papers made public earlier, the bureau asked Ruby in 1959 to become an informant. The bureau said its agents contacted Ruby eight times between March and October of that year, but the night-club owner did not provide any useful information and was never paid by the FBL

The latest document indicates that Hoover was concerned that the commission might become suspicious of the FBI if the bureau failed to tell the complete story of its dealings with Ruby.

The memo, dated Feb. 27, 1964. was sent by Alex Rosen, the head of the FBI General Investigations Division, to Alan Belmont, a top assistant to Hoover. It said the Warren Commission was pressing for additional information about

themselves subjects of an inves-

tigation. Attorney General Griffin Bell's decision to remove Mr. Marston touched off a major controversy in Pennsylvania in part because of Mr. Marston's successful prosecution of major Democratic politicians in the last year.

Carter's Remarks According to Rep. Florio, the President told a group of Democrats at a White House meeting that "the Attorney General as of today has been unable to even ascertain the existence of any such investigation.'

Rep. Florio said that he had told the President that his constituents were concerned about reports that the President had old Mr. Bell to expedite Mr. Marston's Marston's replacement after being urged to do so by Rep. Joshua Eilberg, D-Pa.

Rep. Eilberg, according to Justice Department sources here and in Philadelphia, is a subject of an investigation that Mr. Marston's office has been conducting since last summer into allegations of financial irregularities in a local hospital construction project.

The White House said yesterday that Mr. Carter had been told only that Mr. Bell had no evidence that Rep. Eilberg was a target of an investigation, not that there was no investigation at all.

'Could Be Devastating' Mr. Marston, however, said that the statements attributed to the President could be "devastating," because "no middleman in any of these transactions will cooperate if he gets word from the White House that no investigation exists."

Although he would not identify any of the persons under investigation, Mr. Marston said any suggestion that his office is not conducting an investigation is "flat dead wrong." He said that he has asked the Justice Department to make a complete correction.

Marvin Wall, a press aide to Mr. Bell, said last night that "our policy is not to comment on any investigations that we are or are not conducting."

Before Mr. Marston asked for a correction, however, several Justice Department officials confirmed privately that at least two Democratic congressmen being investigated by the office.

Justice Department officials generally consider that a person is a target of an investigation he could be indicted for a specific

Sources here and in Philadelphia said that Rep. Eilberg is among a number of persons being investigated by Mr. Marston's office in connection with a construction project at Hanhe Hospital there. They said that Rep. Daniel Flood, D-Pa., is also

Lobbies Gave \$22 Million to 76 Candidates

By Richard L. Lyons and John Jacobs

WASHINGTON, Jan. 18 (WP). -The public affairs lobby Common Cause issued a 1,742-page report yesterday explaining how special interest groups spent \$22.5 million to try to influence the outcome of the 1976 congressional

Interest groups gave \$49,400 to Rep. Joe Waggoner fr., D-La., conservative leader in the House, spaprently to retain his goodwill. He had no opponent

Tom Hayden, redical leader of the 1960s, reported receiving \$1,014 from interest groups in his losing race in the California Senate primary. It consisted of \$1,000 from Dairymen Inc., \$13 from Johns-Manville Corp. and \$1 from Hughes Aircraft Co

Overall, interest groups—business, labor and others—gave nearly twice as much in 1975-76 as in the two years before the 1974 elections. They favored incumbents over challengers by a ratio of 3 to 1.

Twice as Much

The biggest increase in giving was among business groups; they nearly tripled their 1973-74 fig-

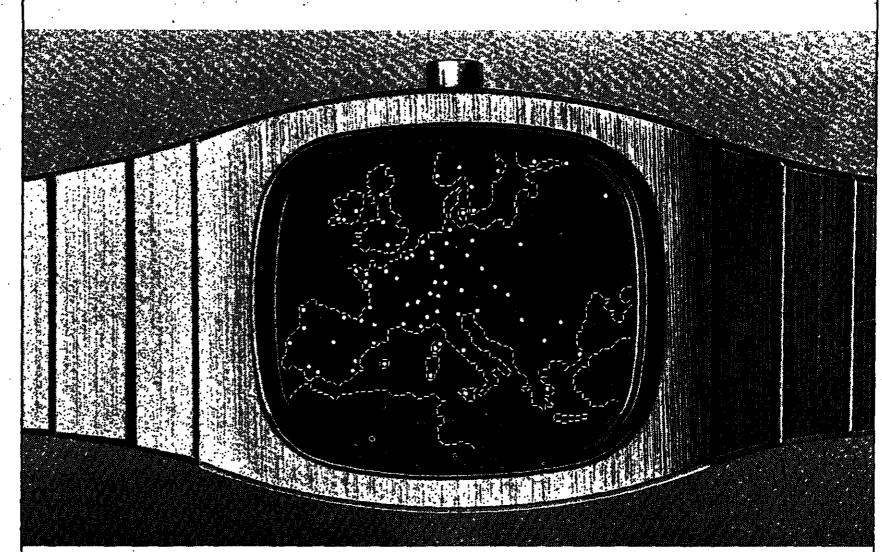

Labor groups gave \$7.4 million, all but \$250,000 of it to Democrats. Business groups were more evenhanded, dividing their \$7.1 million about 6-4 in favor of Republicans.

The biggest special-interest contributor to the 1976 congressional campaign was the American Medical Association, with \$1,780,-879. It was followed by the dairy committees (\$1,362,158), AFL-CIO (\$996.910), maritime unions (\$979,-691), United Auto Workers (\$845,-929) and oil, natural gas and coal interests (\$809,508).

Italy and the Communists

Italy's infinitely cautious Christian Demo-· crats, who have dominated every government for 30 years, now face a double dilemma. First they have to find some new accommodation with the Communists, who want seats in the cabinet. But beyond that, these Christian Democrats-an ingrown circle of career politicians—have to find a way to govern an increasingly tense and divided country. The United States is now leaning on them publicly not to bring the Communists into formal participation in the government. But political strength is now so narrowly divided, in the country and in the Parliament, that no government at all can be formed without some substantial degree of Communist support.

While the slow dance goes on among the party leaders, out in the streets the fighting among political extremists is on the rise again. There has been an ugly series of attacks on public figures. Italy's inflation rate and unemployment rate are both the highest of any major developed country's; industral production and investment are dropping rapidly. The Communists are calling for a government of national unity. But · it is an open question whether that kind of cabinet, embracing all major parties, would make decisive government easier.

The U.S. objections usually begin with references to the effects on NATO, but that's only a part of it. The French elections will be held in March, and the parties of the left are showing great strength in the opinion polls. The quarreling among them has made it highly unlikely that the Communists will be in the next French government, but success for the party in Rome would confer -in at least some French circles-a certain reflected respectability and acceptability on the party in Paris. There is also Italy's economic program, designed mainly to bring inflation under control. The International Monetary Fund has been giving Italy financial support, but only on condition that it maintain a comparatively restrictive econom-

ic policy to try to hold prices down. That, of course, will become much more difficult if the Communists come into the government carrying all of the pent-up expectations of their followers. Governing Italy currently means presiding over a drop in the standard of living, not a comfortable process regardless of who is in the cabinet. But the uncertainty over the economy and the uncertainty over future Communist influence tend to aggravate and compound each other.

It is quite wrong to speak of a possibility that the Communists will come to power in Italy. They have already come to g very substantial degree of power, especially since their gains in the 1976 election; they share widely in the actual governance of Italy. They brought down the Andreotti government by a gesture last week, because they want to renegogiate the terms of their support. The immediate prospect now is for a long and intricate parley in which the Christian Democrats will give a little ground while still seeking to avoid that final, formal recogniton symbolized by cabinet appointments. Whether they succeed is entirely unpredictable.

Some Italians have vehemently protested the State Department's statement last week declaring U.S. disapproval of Communists in European governments. They called it interference in their internal affairs. But that's a bit disingenuous. If the Carter administration had said nothing, its silence would have been cited in the same quarters as evidence of acquiescence. Yet, having made that declaration, what else-if anythingought the United States do? As a practical matter, the possibilities are not promising. This country still has influence among Italians, but that influence has greatly diminished over the past decade. Italy now seems to be moving slowly and reluctantly toward a historic turn in its politics—and for the first time in a generation, it is not waiting for Washington's approval.

THE WASHINGTON POST.

Jaworski's Complaints

The Justice Department made, we suppose, the best deal it could to obtain the testimony of Tongsun Park, the South Korean rice trader indicted for buying influence in Congress. In exchange for his "truthful" testimony and "full cooperation" at a decosition in Seoul and at subsequent trials here, as determined solely by the Department of Justice, the department offered him immunity from prosecution. Sure, it would have been preferable to question him out of South Korean government hearing, and to take testimony as well from current South Korean officials, including the two past ambassadors to Washington and the former director of the Korean CIA. But the Justice Depart. ment did manage to move the stalled influence-buying inquiry off the dime.

Leon Jaworski, special counsel to the House Ethics Committee, protests that Justice did not get Mr. Park to testify before a grand jury (that is, out of South Korean government hearings). True. He's unhappy that Mr. Park is not required to answer questions about present South Korean officials. True. but we note a promising loophole: This ban does not apply if the involvement of the officials occurred in the United States or in the presence of U.S. officials. Mr. Jaworski also criticizes the Justice Department for suggesting that the Congress content itself with a transcript of the Seoul deposition. True, but the Justice-Tongsun Park agreement will bring the South Korean to this country, where it will be possible-with his agreement, his attorney says-for Congress to take his testimony.

It has to be kept in mind that Justice and

Congress have very different aims. The Justice Department wants to make criminal cases. Congress and its members want, or so we still presume, to demonstrate that they are as vigilant in policing- and disciplining—themselves as they are in overseeing the executive branch. To do this they must see not only that no member broke a law but also that no member violated Congress's own ethical standards. They must demonstrate, in the end, a willingness to bring their own members to book for violations of the rules, and for censure or even expulsion if such punishment is warranted. There may be only a "handful" of fresh indictments (and none of sitting congress men), the Justice Department now says. But Rep. Bruce Caputo, R-N.Y., who sat in on the opening sessions of the Park deposition, says that "dozens and dozens" of congressmen were touched in some way by the influence-buying scandal. * * *

This is the monkey on Congress's back. It is a diplomatically embarrassing fact, but a fact no less, that Congress can't get rid of that monkey unless Seoul cooperates. Congress has the power—in its direct control over aid funds and its indirect control over the whole climate in which South Korean-U.S. relations are conducted—to bargain for further testimony by other South Koreans. even by present officials, if that proves necessary. We read Mr. Jaworski's complaints not so much as an attack on the Justice Department as a signal to South Korea that it can't get away merely by producing Tong-

'Crude Warning' From U.S.

They [the Italian Communists] know that a minority Christian Democrat government cannot govern without negotiating some kind of deal with them; but they also know that an election campaign can only accentuate the antagonism between them and the Christian Democrats which they wish to avoid. It is hard to see, therefore, that new elections would at this stage be in the interest of the Communist party. In these circumstances, it is also difficult to see that

the U.S. State Department's crude warning against Communism was particularly apposite let alone constructive. The Italian political system is peculiarly idiosyncratic, and only the extreme right wing in Italy can really welcome this kind of outside

Ecuador's Transition

After nearly six years of tight control by the armed forces, Ecuador has now taken the first step towards a return to civilian rule. In a referendum on Sunday the electorate gave majority support to a new Constitution, and this will be used as the basis for a presidential election in July. The country thus joins the small group of Latin American regimes-including Peru and Bolivia—which are making the transition from military rule, and the process will be watched with some interest.

PARIS-That there are two sides to every question is evidenced this morning by the commercial cable interview with Dr. W. D. Crum. President Roosevelt's Negro appointee to the Collectorship of the port of Charleston, S.C. In spite of all the opposition to the appointment, Dr. Crum points out that the Negroes of the South have made great strides toward education and proprietorship since their emancipation from slavery, and are staunch patriots.

Fifty Years Ago

January 19, 1928

MOSCOW-Soviet officials hurried Leon Trotsky through the Kazan rallway station at Moscow yesterday toward his exile, while crowds outside the station sought vainly to give him a cheer, according to reliable information reaching here. The town where Trotsky must live is reported to be near the Chinese frontier, in the Asian part of the Soviet Union. His future is still in doubt, and no one really knows if this banishment is temporary or permanent.

'No, I'm Not Going to Tell Your Parents! I'm Going to Do Worse Than That—I'm Going to Turn You In to Joe Califano.'

Carter and the Congress

By James Reston

WASHINGTON—In his "calendar of great Americans," Woodrow Wilson made an observation about Mr. Lincoln which still stands as a fairly good test of U.S. presidents at the end of their first year in the White

"The most significant thing about the career of the man [Lincoinl." Wilson wrote, "Is the way in which he grew steadily into a national stature . . . as he grew, everything formed, informed, transformed into. The process was slow but unbroken. He was not fit to be president until he actually became president. He was fit then. because learning everything as he went, he had found out how much there was to tearn . . .

This is a startling observation from Wilson, who lost so many of his dreams of a League of Nations because he learned so little about how to get on with the Congress. And this is the question now being asked about President Carter as the Congress returns to a snowy Washington: What have they learned about one another in this first year, and how will they get on together in the sec-

Consultation

They didn't get on very well in 1977 for many reasons, most of which are blamed on the President. The main charge against Carter is that he tried to do too much too soon, with too little advance consultation with the leaders of the Congress.

Arthur Schlesinger jr., who has not been excessively critical of Democratic presidents, takes a different view. He argues in the Wall Street Journal that Jimmy Carter is doing too little too late; that he is really a Republican in Democratic clothes; and that he is not really an "activist" President, but a compromiser with the Congress, a "stand-patter" who "has tried to do rather less than Wilson, FDR., Truman, Kennedy or Johnson tried to do in their first year."

There is obviously something to this argument, but I don't think it's quite fair. You can argue against the "imperial presidency" and also against the "stand-patism" of Mr. Carter, but it's a little awkward to do both. Nevertheless, at the beginning of his second year, Mr. Carter is clearly in the middle between the people who think he's being too dogmatic too fast, and the people who think he's being too easy and too slow. Which brings us back to Woodrow Wilson's question, which is whether new presidents are "learners" or, as he put it at another time, "whether they grow or merely swell." The testimony of the Democratic leaders who met with the President on Tuesday in the White House is that Carter has learned a lot in his first year that will be useful in

Discuss in Private

For one thing, he has learned that it is wiser to discuss his policies in private and in advance with the legislative leaders than to amounce them publicly and fight over them later. He has also learned that the Congress of the United States is not just a bigger Georgia Legislature, and that it is much younger, much more independent and combative than in the days of Franklin Roosevelt, House Speaker Sam Rayburn, and Senate majority leader Lyndon Johnson,

Mr. Carter was probably quite wrong in assuming, as he did in the presidential election campaign of 1976, that a Democratic president and a Democratic majority in the House and Senate would somehow produce party unity. He has learned since then that there is very little party loyalty, that most Democratic members of Congress ran ahead of him in the last election, and that the party leaders in the House and Senate can no longer command votes

for his policies Two important things have happened since the war orisis in Vietnam and the constitutional crisis over Watergate:

First, the President has lost his power to invoke "executive privilege" in the name of "national security:" and second. power in the Congress has been dispersed from the leaders and the committee chairmen to the

subcommittees and the party caucuses. So everybody is more emial and hobody is in charge, This was Carter's problem as he outlined his State of the Union message and his budget to the so-called "party leaders" this

Respect Values

Under these circumstances, what the Democratic leaders are hoping for is that the President in his second year, will be more flexible than in his first. They respect his intellectual gifts and his moral values; but not his political techniques. They think he has been too remote, rigid, selfassured, and even self-righteous; but they seem to agree that he is learning and will change in the

Maybe they are right—and they probably are but it is not at all

the job, as Woodrow Wilson said of Lincoln, but he is a very stubborn man, and what he may be learning is that the new young independent Congress, even les than the old disciplined party Congress, will vote its own selfish nterests rather than the interests

This will come to the test fairly soon in the Panema Treaty vote, welfare reform, tax reform, the strategic arms agreements with the Soviet Union, and guarantees for a compromise settlement in the Middle East.

Changes Seen

Mr. Carter has been discussing these things with the congres-sional leaders this week before his State of the Union message. They have been going over their differences in his first year and the agenda for his second, and somehow they are trying to get together. As one of the President's most

loyal supporters puts it, Mr. Car-ter has been thinking like a prime minister instead of like a president. He sends up a complicated energy bill, and says the freedom of the republic depends on it, without really serious consultation with congressional leaders in

But there are signs that this is changing now in the new year, for good or ill, depending on your point of view. The President has gone over his messages to the Congress very carefully with the congressional leaders this week and this is taken by House Speaker Tip O'Neill and majority leader Robert Byrd in the Senate that there will be a better partner-

A Vote for Amnesty's Campaign

By Jonathan Power so-recent-past innocent people

LONDON-Amnesty Interna-tional has lost an important mber of its Advisory Board— William F. Buckley jr. In his column (IHT, Jan. 9) he wrote that he was surprised to learn of Amnesty's new anti-capital punishment campaign. "Why is the business of Amnesty to insert itself in quarrels over appropriate forms of punishment?" he asked,

and then promptly resigned. Mr. Buckley is a superb writer, look up the founding statutes of Amnesty he will find that the capital punishment campaign is no new departure—it is part of the original mandate. Indeed, in Peter Benenson's Observer article in 1961, that led to Amnesty's founding, the abolition of capital punishment is singled out as an objective in paragraph one.

Should this come as a surprise? After all, an organization that is concerned with nonviolent political prisoners must be concerned with a form of punishment which once done is final. The question whether the person executed has been judged guilty of a violent crime or not becomes irrelevant. The question is the ability to bring back the life of a man from the grave. A question that is overnowering once one accepts that all courts are fallible and that even the best judicial systems now admit that in the not-

have been sent to the gallows. The argument that Amnesty also concerns itself with torture is likewise a powerful one. Torture usually is used before a trial. There is at that point no honest way of separating the nonviolent suspect from the violent—except by the judgment of the less than

Mr. Buckley may not be persuaded by me. But he should listen to the voice of someone he deeply admires—Andrei Sakharov, the outspoken Soviet supporter of human rights and like himself on the cautious end of the Amnesty supporters spectrum. "The abolttion of the death penalty is especially important in such a country as ours," he wrote to Amnesty last year, "with its unrestricted dominance of state power and uncontrollable bureaucracy and its widespread contempt for law and moral values. You know of the decades of mass executions of innocent people which were carried out without any semblance of justice (while still more innocent people perished without any court judgment at all). We are still living in the moral atmosphere created in that

Strangely Mr. Buckley does not use the one argument that would give him a case; capital punish-

Letters

Soviet Dissent

In his otherwise thoughtful and useful article about the Soviet human rights movement (IET, Dec. 31), David Shipler writes: "The dissidents issued no detailed analysis of the Soviet constitution adopted in October. This is far from the truth. Within a few weeks of the publication of the draft constitution in the summer, dissenters had written a considerable number of such analyses. The Moscow samizdat journal, A Chronick of Current Events (No. 46, August, 1977), summarizes 10 such documents and also the first two issues of a samizdat bulletin, On the Draft Constitution the U.S.S.R., which had quickly sprung up.

As the Chronicle reports, all the commentaries "were sent to the Constitution Commission, to Soviet newspapers, or to governmental bodies, but not one of them was accorded even a mention in the media."

The International Berald

Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. Anonsmous letters mill not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writ er's complete address.

Among those which have reached the West are two especially stimulating and wide-ranging commentaries, one by the well-known Moscow barrister, Mrs. Sofia Kallistratova, who recently joined Dr. Orlov's Helsinki monitoring group when its members were being arrested and forced into emigration, the other by 12 dissenters of long standing. More narrowly focused is an analysis of the new constitution's threatening implications for religious people, by the Christian Com-mittee for the Defense of Be-

published in the New York journal, A Chronicle of Human Rights in the U.S.S.R., but not, mainly for lack of sufficient public and journalistic interest. in the press. This is unfor-tunate, as they document very well something which has been widely overlooked: the essentially reactionary nature of the new constitution, many of whose formulations are directed analyst those social groups calling for constructive change, and against the spirit of detente and the Helsinki Final Act. Among other things, any Soviet citizen who expresses non-Communist views is now, in effect, placed outside

PETER REDDAWAY.

ment for terrorists. The morality of killing terrorists cannot properly be distinguished from the morality of killing enemy soldiers in a war. The distinctions into innocent or guilty of normal judicial practice become blurred.

Eye for an Eye

The question then becomes one of political wisdom. Is it sensible to engage the terrorist in this way? Is it not likely that capital lead to further terrorist outrages? The terrorist could be expected to apply the doctrine of an eye for an eye. More and more innocent people would be killed. The inevitable impact of the death sentence, the drawn out appeals that often follow, and the execution itself niav into the hands of the terrorist groups. The condemned terrorists become martyrs, even heroes in the eyes of many. The demarcation lines between supporters and opponents of terrorism begin to fade as liberal abolitionists become drawn into smonorting the campaign for their

Eichmann Case There is also, I think another

argument. It was used by Victor Gollancz in 1961 in an attempt to stop the execution of Adolf Richmann. It is an argument of emotion and passion and ulti-mately of faith. In the end it is the one I find most convincing: "For a court of three mortel judges to award death to such a man, on the ground of compensatory justice, is to trivialize, in a manner most grievous, the crucifixion of a whole people. One man's death, carried out with at any rate a pretense of decency, against the bestially contrived deaths of 6 million! There is a Roman word - sacer - which means at once sacred and actranslate it, only by God. Cain, in the old legend, was sacer: a mark was put upon him by God, precisely so that he might go forth among men and not be killed. Well, if the need for compensatory justice and the total guilt of Adolf Eichmann are both accepted, he, perhaps above all living men, is -sacer.

China Sends 3 Top Aides To Cambodia

PEKING, Jan. 18.-A senior Chinese government official and two Foreign Ministry officials left unexpectedly today for Phnom Penh, prompting speculation of possible moves to get Cambodia and Vietnam to negotiate.

The speculation was fueled by the presence in Peking of Vietnamese Vice-Foreign Minister Phan Hien, who is said to be a specialist in border problems. Diplomatic sources said that he arrived on Jan. 9.

China is believed to be concerned over Cambodia's recent break in diplomatic relations with Vietnam and over the fighting between the Communist neigh-

Mrs. Teng Ying-chao, widow of Premier Chou En-lai and a vice-chairman of the National People's Congress, left for Camforeign affairs, Han Nien-lung. and the director of the ministry's Aslan affairs department, Shen Ping. The Chinese news agency called it a friendly visit. Middle Path

Peking appears to have been following a cautious middle path in the dispute between Cambodia and Vietnam despite its strong ideological ties with Cambodia. China has expressed hope that a peaceful solution can be found through negotiations.

Vietnam has called for quick

talks at any level to settle the border dispute, but Cambodia has rejected negotiations until all Vietnamese troops have withdrawn from its territory.

Cambodian Premier Pol Pot said that his army scored "fresh victories" against Victorieses forces, killing or wounding more than 12,000 soldiers and knocking out 130 tanks. Radio Phnom

Penh announced today. Meanwhile, official Vietnamese reports in Hong Kong indicated that thousands of rebel soldiers of the former Saigon regime are attacking Vietnamese forces. The reports said that the remnants of hiding in Giang Province and attacking the Vietnamese troops from the rear.

an agreement approved by both their memberships, nothing is expected to happen for several

Many Similarities

As he points out, both organizations are similar in many important respects. The Trilateral Com-mission, which was founded by David Rockefeller in 1973, has been described as a "sophisticated establishment Rotary Club" and a Tosting seminar for business and academic and political lead-

Its members are mainly estabtishment figures recruited from North America, Western Europe months, they get together to discuss world problems, and the ssion hires experts to make The Atlantic Institute is direct-

ed by Martin Hillenbrandt, a former U.S. ambassador to West Germany, and as one Trilateral staffer said, "At any given time, there's probably an overlapping group of 10 to 20 individuals who hold membership in both."

However, the two groups are not identical. The Trilateral Commission tries to suggest policy options on a variety of topics, while the Atlantic Institute is geared more toward instituting and subsidizing earch on economic problems.

Wide Abuses Alleged

Senate Panel Checks Bias in Insurance Sales

By Jo Thomas

WASHINGTON, Jan. 18 NYT .- Irma Carroll, widowed after 28 years of marriage, decided to switch auto insurance companies when Gelco & Affiliates closed its local office in Raleigh. N.C., and she figured that "a widow might need a little more

So she inquired how much one auto insurance policy would cost. and was told "about \$189." "Everything went all right," she recalled, "until they got to whether I was married or single, and I said I was a widow, and she said, 'Oh, my God, in this case it will go up about \$200."

Mrs. Carroll is among consumer, government and industry witnesses scheduled to testify today and tomorrow before the Citizens and Shareholders Rights subcommittee of the Senate Judiciary Committee, which is investigating reports of discrimi-natory practices by insurance

Many insurance underwriting manuals obtained by the subcommittee staff show that agents writing auto and homeowner insurance policies at standard rates are instructed to reject applicants because of occupation sex, marital status and other factors that the manuals concede are subjective and unsubstantiat-

Beauticians and manicurists (unmarried) are considered poor risks. So are musicians, farm workers, professional athletes waiters, cooks and military perconnel under 25. So are divorced persons, particularly if they are men.

"While we admittedly canno readily document our opinions on this and many other points," the underwriting manual for the Continental Insurance Companies observed. "we nevertheless are con-

vinced, without the slightest reservation, that, when considered as a group rather than as individuals, persons engaged in some eccupations have a much greater frequency of loss under homeowners policies than do persons

engaged in some other occupa-

"While we do not maintain statistics by occupation-far too often we have not known what they were—this is not a completely unsupported opinion. It supported by observation and the scars of experience,"

'Model' Risks

manual said.

Occupations listed by Continental as having high losses include advertising employees, antique dealers, caterers, fashion designers, hairdressers, radio or television station executives, and restaurateurs.

These occupations simply attract a "disproportionate percentage" of persons who fail to re-semble the company's model risk: stable, conservative married man who pays his debts and stavs home. Bad risks, according to the manual, include "the swinger, the high flyer, the ostentatious, the excessive entertainer, the celebrity, the slow payer who lives beyond his means, the excessive drinker or gambler including amsteur, the emotionally un stable and quick-tempered, the exhibitionist, the jet set member, the divorce repeater and the just plain ornery."

Shirtless, Shiftless

"There is also the type," the manual said. "who has never lived anywhere but in a rural area. He commutes to an industrial plant, does odd jobs, lives on relief, or lets his wife make the living. You can usually spot his place. Sometimes in the summer he can be seen sitting on his

is not a goard risk.

The introduction to the Conticental underwriting manual says that it was written in 1969 and

revised in 1975. "I think the guy that wrote that meant it," George Keyes, general counsel to the Continental Companies, said. "He was a Texan, I'm a New Yorker, I

sit on the porch without their Mr. Keyes conceded that insurance underwriting is "not a science" but often entails a "gut reaction" to signs that a person

was brought up with people who

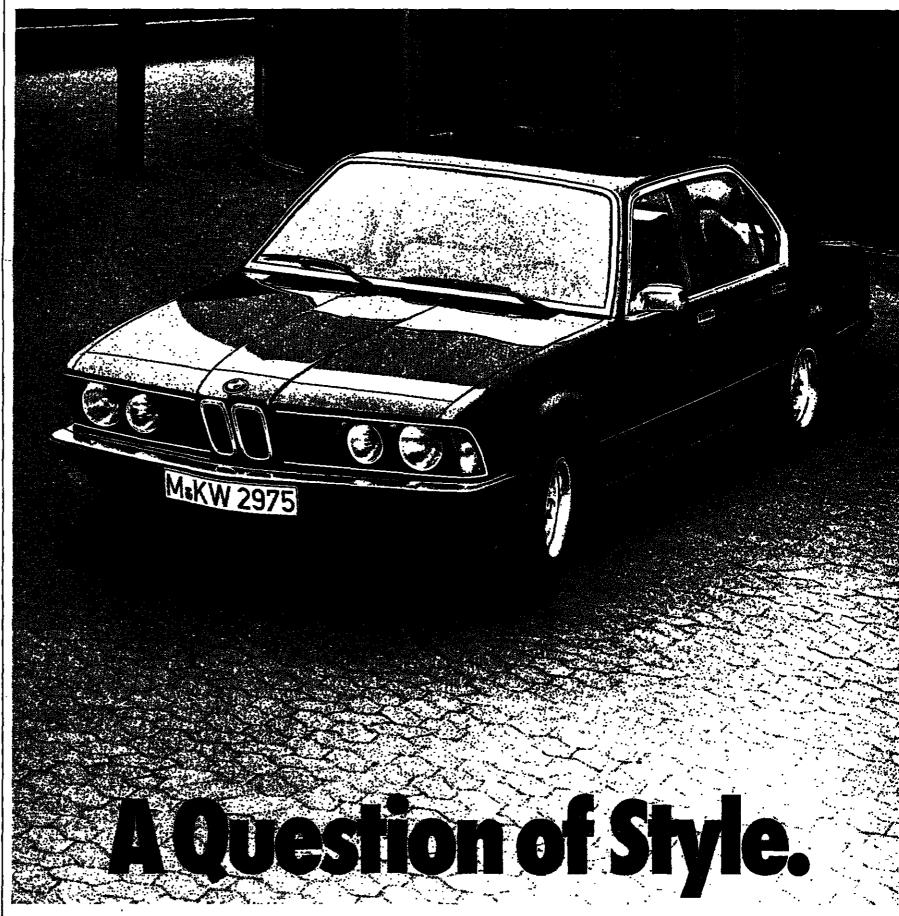

may be a bad, or target, risk. Rate Structure

"Target risks are dangerous," he said. "We're trying to make money writing insurance. If we insure you and insure a target risk and omeone hits the target, we raise rates and you're unhappy."

Occupational warning signs for risky applicants at the Lumber-man's Mutual Insurance Co. include junk dealers, traveling salesmen and artists. The Hartford Insurance Group has cautioned against airline stew-ardesses, iron and foundry workers, construction workers and garment workers.

Kenneth Hahn, superintendent Los Angeles County and one of the scheduled witnesses, has contended that his entire county is discriminated against by auto insurance companies. He has reported that drivers in Lakewood a city in the county, have half the accidents of Bakersfield, in Kern County, but pay 50 per cent more for auto insurance.

Although males under 25 traditionally have paid higher rates, the data underlying a report of the National Association of Insurance Commissioners reveals that 89 per cent of all male drivers under 25 have not filed

Automobile styling not only indicates the origin of a model, it also embodies a certain character. The BMW image is traditionally one of functionalism and dynamic power, and the best expression of this unique character is found in the new BMWs. In spite of their larger dimensions and increased passenger accommodation, they appear less pretentious and cumbersome than other cars of a similar size in the international luxury class.

For us at BMW there is a difference between pretentiousness and exclusiveness, and the discreet functional elegance of the new BMWs illustrates this distinction. BMW cars owe their style to their makers, but they are a tribute to the taste of those who buy them.

BMW cars

The BMW range of fine automobiles: the ultimate in performance, comfort and safety.

Designed for the man who appreciates the excitement of driving.

Angry Teamsters Cite Chiefs' Pay

WASHINGTON, Jan. 18 (AP). -The list of Teamsters Union officials earning more than \$100,000 a year is getting so large it can no longer be considered exclusive, a dissident Teamsters group says. Nineteen union officials receiv-

ed more than \$100,000 in salaries. allowances and expenses during 1976 and 54 officials were paid nore than \$70,000 last year, according to the Professional Drivers Council.

The Council, claiming 5,700 members, said yesterday that its information was from U.S. Labor Department records. Teamster officials were not available for com-

Tremor Hits Argentina BUENOS AIRES, Jan. 18 (Reuersı.—A major tremor was felt in western Argentina yesterday, neluding the central city of Coroha. officials said

26; James Schoenfeld, 26, and his brother Richard, 23, pleaded guilty and are awaiting sentence, Details of their motives emerged in a book, "Why Have They Taken Our Children?" by detective Jack Baugh and journalist Jefferson Morgan

The authors said that diarles written by James Schoenfeld showed that the three men intended to ask \$5 million in ransom to realize Mr. Woods's dream to buy and restore Rengstorff House, a decaying Victorian man-

icn south of San Francisco Diaries Not Belcared

The diaries have not been released because of a court order. But Mr. Baugh and Mi Jefferson said they showed that the men intended to hold most of the ransom ! - five years wrongly believing that it would then be too late to prosecute them.

The children escaped before the ransom demand could be delivered. The book said that the abductors planned to have the money dropped from an aircraft

and then escape in a car painted black to prevent detection from the air. One of them was then to take off in a commandeered plane and throw out human dummi's fitted parachutes to confuse with

The book said that none of the men knew how to pilot a plane and intended to take an aircraft fitted with an automatic pilot. The man aboard was to parachute to safety, leaving the plane to crash. The three intended eventually to escape to

U.S. Sees Rise In Arms Sales

WASHINGTON, Jan. 18 (Reuters). - The Defense Department yesterday estimated that foreign arms sales rose nearly \$2 billion to a record \$13.2 billion despite President Carter's sales-cutback

Pentagon spokesman Tom Ross, who announced the estimate, also said that U.S. weapons sales abroad would rise still further in 1979 to \$13.6 billion.

U.S. foreign arms sales for the 1977 financial year, which ended on Oct. 1, totaled \$11.3 billion. In June last year President Carter announced a policy of reducing 1978 arms sales below the

According to Mr. Baugh and Mr. Jefferson, the plot was inspired by the Clint Eastwood film, "Dirty Harry." The three studied nearly every rural school in central California before deciding on the school at Chow-

Before the abduction, they dug a hole at a quarry owned by Mr. Woods's father and buried a furniture van in it. The chikiren and the bus driver were eventually held hostage in the van.

The book says that Mr. Eastwood also helped detectives working on the case to get fingerprints of a would-be scriptwriter friend of Mr. Woods. The friend was known to have discussed with Mr. Woods several crime-film scenarios

The fingerprints helped clear the writer of involvement in the crime, the book said.

retain the historical inheritance Christened de Zwerver (the Wanderer) in 1900 by its builder.

Above: one of the many technical drawings made by Wiifor 1 million deutsche marks nand Nieuwenkamp of the exterior and interior of the Wanderer. At right: a partial view of the interior of Holland's oldest houseboat, for sale for \$470,000. Brandt, 39, feels that now is the

Accuriro'.

the houseboat is fitted with 17thcentury cabinets and chests, Delft blue tiles, precious leadedglass windows, porcelain closets, an impressive fireplace, old chandeliers and many other antiques. Two years later, when his family expanded, Nieuwenkamp added on to the front and rear bringing the total size to 100 by 17 feet with a maximum height of 12 feet. Brandt was living on a tialk.

an old Frisian boat, when he heard that de Zwerver, moored nearby, would be auctioned off by its owner to meet financial ligations. Brandt commented. "It was badly battered on the narrow, heavy-traffic channel leading to the Vecht River. This relic of more glorious days, neglected as it changed hands four times, was going on the block for its antique wood, tiles, glass and furniture. Fearing I might lose out to the salvagers. I bought it an hour before the sale. Dealers have been coming around ever since and Sotheby's furniture expert recently tried to buy the two-big Gelderse cabinets. But nothing will leave the

ship.
"After I became skipper of this

Nieuwenkamp's family with his graphic work, drawings and shipboard furniture. We managed to buy blueprints, interior and exterior drawings and cabinets from the curator, who knew they would be going home. At an and pastoral serenity in a house antiquarian, we located Nieuwen boat with all the amenities and kamp's book, 'My House on the Water,' about his dream ship. It antique trappings he enjoyed in his residence near Haarlem. He has a cover coat of arms bearencountered family criticism but ing the Latin legend, Vagando persisted with his concept.

Brandt engaged cabinetmakers and maritime craftsmen to clean up wood rot, replace benches, make doors and fix leaded-class windows. Emphasis was on authentic restoration. In pulling off plywood and scraping off layers of paint they found beautifully carved decorations. After three years' work, following Nieuwenkamp's plans, the boat was back in its original state. Brandt's dedication to preserving this movable monument would have pleased the imaginative architect.

off tank for central heating

Installed Atelier

When the plans were drawn. he stripped his residence of evcrything of aesthetic value. He even dismantled his atelier. which was created from exotically carved beams and panels pickup in 1898 in Indonesia. All of this was transported to a Haarlemmer Lake wharf to be fitted into the bost.

An atelier was included so he could draw and print etchings. The steel-hull construction was riveted by hand. Cork lining went between the double walls to fight dampness and assure heat retention. Under the ship,

was placed in a large storage

In the meantime, the architect continued his search for lumber to further embellish the interior. He brought back teak from the Orient, clive wood from Lebanon, Slavonic teak and pitch pine from America. All were selected for color and grain to complement the antique pieces and

Working alongside the maritime artisans, Nieuwenkamp carved doors and panels with his own graphic designs, using a finde-siècle style then in fashion and nowadays romantically nostalgic.

From the gangplank, a visitor enters the ship's center and walks down a few steps to the dining area, which is lined with precious porcelain China cupboards, a rare complete series of Delft

INTERNATIONAL TENDER NOTICE WATER SUPPLY FOR THE INDUSTRIAL AREA OF GABES

The Société Nationale d'Exploitation et de Distribution des Eaux (SO.N.E.D.E.) is launching a call for international tenders in connection with the acquisition of supplies required for the realization of six drilling rigs for a 1,000-meter depth to supply the industrial zone of Gabès with water

These supplies-partially financed by the Arab Fund for Economic and Social Development-represent the follow-

"Casing API Tubes" of a total length of 5,360 meters-360 meters with an 18"5/8 diameter and 5,000 meters with a 13"3/8 diameter; furnishing of drilling accessories; furnishing of six drilling heads: furnishing of 600 meter-long strainers for drilling.

Tender files may be withdrawn at the SO.N.E.D.E. (Service Marchés), 23 Rue Jawaher Lei Nehru-Montfleury-Tunis, against payment of fifty (50) Tunisian Dinars.

The deadline for submitting offers and opening envelopes is set for the 14th of April, 1978, at 11 a.m.

9. Homesick.

(Another good reason to call home.) An international call is the next best thing to being there.

TENDER NOTICE

THE MALAWI GOVERNMENT

CONSTRUCTION OF ASPHALTIC

CONTRACT No. 8/78

POFQUALIFICATION OF TENDERS

The Malawi Government intends to apply the proceeds of a loan from the OPEC Special Fund to the construction of asphalitic overlays to existing 6.7 kilometer bitumen-surfaced carriageways at the following approximate localions on Route Millin the Central Region of Malawi:

The thickness of asphaltic overlay required is expected to vary between 50 and 100 mm. In certain sections the overlay will consist of a regulating course and a wearing course and it is anticipated that to 10 13 km of such double course work will be involved. The work will also include the making-up of the 1.5 m shoulders with naturally occurring gravel materials over the full length of the scheduled sections.

It is anticipated that request for tenders will be Issued In mid-March, 1978, with a tender period of 60 days.

SCOTT WILSON KIRKPATRICK AND PARTNERS,

reach the Lilongwe office of Scott Wilson Kirkpatrick & Pariners not later than 28th February, 1978 Tender documents will be Issued only to contractors who respond to this notice and can satisfy the pre-qualification requirements of the Abalawi Government and no reason for relections will be given. and Africa is provided in Brazil, is inadvisable unless you are fond of stew with the consistency of Okra is always harvested unripe, about 2 1/3 months after planting, when the pods, which are its most edible part, are from 2 to 9 inches long. If allowed to ripen, okra becomes fibrous and indigestible. In America it is which has to be prepared according to a ritual formula from usually seen in stews and soups

Very Name

which any deviation would be

Okra is also tied to Africa by its very name. It comes from nkruman or nkrumun, from the Twi language spoken on the Gold Negroes from Angola brought okra to America, too. but called it, in Umbundu. ochinagombo or ngombo. This became gumbo, but has changed its meaning. Gumbo originally meant the vegetable, but is now applied ost the only dish, except soups, in which okre is used in the United States, a catchall stew adopted from the Indians (one of the ingredients it caught in their time was owl), which was thickened with file powder made from dried sassa-

scene, it displaced file powder as the thickener and gave its other name to the stew. However there are traditionalists (who do not know they are traditonalists) in the South, who still prefer file powder to okra as the thickener, so today there are gumbes which have no gumbo (i.e.,

guide for Americans abroad that okra (which incidentally, is described as a sort of squash, proof in cross section, cut into thick enough that its author is not a Southerner) is "very common . in France; in England and Germany less so."

and I have yet to see okra,

or Charleston's okra pilau, otherwise known as Limping Susan.

Dying Interest Fresh okra used to be a fixture in American vegetable markets, but it is disappearing now, for it is one of the sorts of food which supermarkets prefer not to handle: instead it is sold canned, frozen or dried, which may be why interest in it is dying. In a 1974 survey made by the U.S. Department of Agriculture, adults named okra as one of three vege-tables they liked least, and children rated it with four they liked

In Europe, there has been no are eaten though rarely,

in okra, for okra, despite its claim to being a prodigal son, has never aroused a great deal of European interest, exception made for the extreme southeast corner, which is in the Middle East gastronomic beit, and Spain, where the Moors introduced it. I read with some surprise in a

problem of a decline of interest

It happens that I have lived in France for more than 35 years Okra is the contrary of a luxury food. Now grown almost everywhere in tropical, subtropical and warm temperate regions, it is a food of the Third World where it is much more than a thickener.

In India, where a variety slightly different from the American one is known as bendi-kni, it is eaten fresh, prepared like asparagus, or is pickled. In the Middle East, including Greece and Egypt, where it is called by its Arabic name of bamyah or bamieh, the tender young pods enter into various combinations, a favorite being okra and chop-

In North Africa, tropical Africa and Madagascar, the pods, fresh or dried, and the leaves, also fresh or dried, are widely eaten;

the young shoots get around a little less; and even the calvxes

More Californians Choosing the 'Instant Marriage' Route

of the marriage remains secret suggest that it might be a first since the certificate does not contain it.

suggest that it might be a first step toward minimizing government in such personal matters as marriage new, but the fervor for it is, divorce. The American Bar Asso-Confidential marriages have been cistion has proposed a model ciation has proposed a model statute that contains a proresembling California's, Montana and Texas already have similar

> Some Californians choose tha confidential marriage for the reason it was provided—they have been living together and want to get married secretly. More often the reason is the simplicity of the procedure. For their part, the chapels have

been making the instant marriages as attractive as they can, offering settings ranging from a secluded château to the Queen Mary, the ocean liner which is now a tourist attraction in Long Beach, Couples can be married in a five-minute ceremony costing as little as \$20 or a candlelight ceremony recorded on videotape for \$150. The staffs of the chapels will take care of everything, including hiring a minister has led some legal authorities to for those who want one.

Despite its popularity, not everyone is pleased with the Confidential Marriage Act. In 1875, the California Conference of Local Health Officers urged the state legislature to amend the law to require blood and rubella tests. The conference said the change was necessary because about 4 per cent of all blood tests performed in California are positive, which means that as many as 5,000 people have syphilis. The conference urged rubella tests in the hope that they move to decrease the possibility of birth defects.

Los Angeles County Supervisor Kenneth Hahn said that he wished wedding chapels would screen couples more carefully than they do-to make certain that a couple is of legal age (18 years old) and that neither the man nor the woman is married to someone else.

Spokesmen for a number of chapels said that if they suspected a couple were too young, they would ask for birth certificates. And they said they would not marry couples who had obviously been drinking or using drugs.

Japan Offers To Cut Tariffs Average 42%

But Condition Plan On Equal EEC Slash

TOKYO, Jan. 18 (Reuters).— Japan said today it would reduce its offer of import tariff cuts averaging 42 per cent on 2,630 manufactured goods if the Common Market insisted on smaller

overall reductions.
The International Trade and Industry Ministry, only hours after announcing the offer, said the cuts would be reduced to less than 40 per cent if the EEC went ahead with its proposal. The ministry was commenting

on the outcome of a meeting of EEC ministers yesterday, which gave its negotiators at the General Agreement on Tariffs and Talks (GATT) talks in Geneva the go-ahead to follow a U.S. proposal for 40-per-cent cuts. But the ministers made clear

that the nine-nation group would probably seek smaller cuts in deference to French insistence that 40 per cent was too high. While making plain its concern should the EEC agree to a lower

figure, the Japanese ministry

added it would still make the offer of 42 per cent. The cuts, to be carried out over eight years starting in 1979, would lower Japanese import tariffs to an average of 6.2 from 10.8 per cent, the ministry said.

Of the 2,630 items, tariffs on 880 products including steel and machinery would be cut by more than 40 per cent, those on 1,490 items by 40 per cent and those on 320 other items either by less than 40 per cept or not at all, the

The proposed reductions would follow the so-called harmonization principle which calls for small cuts in low tariffs and large cuts in high tariffs, it said.

On non-tariff harriers, another subject to be discussed at Geneva, Japan said it has received 92 requests for removal and is ready to remove or ease 17 of these barriers but will reject 23 other requests including demands for the removal of import curbs on leather and silk thread.

The remaining 52 requests will be negotiated individually or with groups of countries in the course of the talks.

Details Submitted

GENEVA, Jan. 18 (Reuters).-The Japanese ambassador to the ns in Geneva ited a 400-page document, detailing his government's trade offer, with the GATT secretariat today The 98 nations taking part in the talks, formally begun in 1973, agreed here last November to submit by the week beginning Jan. 15 their individual replies to trade concessions demanded by the

other countries involved. The Japanese document was the first received. The United States and the EEC were expected to deposit their offers on

FINANCIAL NEWS AND NOTES

Crane Buys 8.6%-of Zapata Crane Co. has purchased 630,800 shares, or

about 8.6 per cent of the oustanding common stock, of Zapata Corp. Crane, a diversified manufacturer of pollution control systems, steel products and aerospace equipment, says the Zapata purchases were made in the open market at prices ranging from \$14.50 a share to \$19.50 per share over the last month at a total cost of about \$16.6 million. Crane says it acquired the shares for the purpose of acquiring an equity interest in Zapata and does not intend to seek control of Zapata, propose a merger or other form of combination. Although in the past Crane has taken action to take over companies after acquiring an equity interest in them, Crane says it does not plan to take any such action with respect to Zapata, an offshore drilling and min-ing company. Crane adds that if appropriate opportunities are available to do so, depending on market conditions and other factors, it plans to continue to purchase Zapata shares.

Toyota, Nissan Exports Soar Japan's two largest motor companies, Toyota and Nissan, report record 1977 exports following sharply increased sales to Britain and the United States. Toyota exported 1.41 million vehicles, a 20-per-cent increase over 1976, while shipments to

Britain were up 27,8 per cent and those to the

United States increased 27.1 per cent. Nissan exported 1.22 million vehicles, up 6.5 per cent from the previous year. U.K. and U.S. sales increased 39.8 and 18.4 per cent, respectively. Toyota exported 31,035 vehicles to Britain, 561,410 to the United States and 108,694 to Sandi Arabia. The figure for Sandi Arabia was up 25 per cent from 1976. Nissan exported 102,975 vehicles to Britain and 498,857 to the United States. 'Toyota's production for the year was a record 2.72 million vehicles, up 9.4 per cent from 1976. Nissan's production, however, fell 1.1 per cent to 2.28 million. Both firms say a substantial increase in their sales to Britain this year should be avoided to prevent unnecessary conflict between the two countries. They say efforts should be made to maintain overall Japanese car exports to the U.K. market this year at the 1977 level of about 10.6 per cent. But Toyota says it will seek a gradual increase in its share, as prospects for the U.K. market were now much brighter.

Zenith to Write Down Swiss Unit

Zenith Radio will write down its investment in Zenith Time, its Swiss watch-making subsidiary, end related watch-distribution operations, resulting in a charge against fourth-quarter earnings of about 40 cents a share. Zenith says the operations have not been profitable and accounted for less than 3 per cent of consolidated sales.

Dollar Steady, Trade Light Netherlands may cut its discount

LONDON, Jan. 18 (AP-DJ).-The dollar remained buoyant against most major currencies in thin dealings today as the foreign exchange market anxious-ly awaited President Carter's annucl State of the Union address

"There is no doubt the market is waiting to see the contents of that speech. A lot will hinge on it." one trader asserted. In advance of tomorrow's speech, operators covered any short dollar positions and then pulled out the market today, dealers said. Conditions were noticeably thin in late trading.

Against the deutsche mark, the dollar finished at 2.1323 DM, up 5 points on the day but down from its intraday high of 2.1390 DM. The Bundesbank bought an estimated \$5.5 million at the afternoon fixing.

The Swiss National Bank parently led central bank activity today, offering francs for the marks, especially, and for dollars. This gave the dollar an even broader lift, one dealer commented. The amount of intervention could not be de-Against the franc. the dollar climbed 2.5 centimes to 2.0175 francs—its highest level in over a week. The franc also declined against the mark.

The Belgian authorities announced today one-percentagepoint reductions in the discount and Lombard rates to 75 per The news had little effect on the franc, dealers said, and the dollar finished at 33.05 francs against 33.00 late yester-

Wages in U.K. Advance 1.9% In One Month

Industrial Output Up In Month, Off for Year

LONDON, Jan. 18 (AP-DJ) .-Workers' average earnings in U.K. production industries and some services soared 1.9 per cent in November, following a 1.5-per-cent-increase in October, pushing the 12-month increase into double figures for the first time since

On a year-to-year basis, the index of average earnings, seasonally adjusted, accelerated for the third straight month, rising to 10.3 per cent in November from 9,5 per cent in October and 9 per cent in September, the Depart-ment of Employment said today.

The index of average earnings rose in November to 300.2 (January 1970 equals 100) from 294.6 in October and 272.2 a year

However, a new, unadjusted index of average earnings of the whole economy, introduced late last year, showed a slight deceleration in November to 8.5 per cent above a year earlier compared with an 8.7-per-cent in the prior month

Meanwhile, industrial production rose 0.6 per cent in November, the government said today. The all-industries index rose to 102.1 from the revised 101.5 in October, but it was down 1.3 per cent from the year-ago level.

The central statistical office, which released the statistics, said the figures "continue to suggest that the underlying level of industrial output changed little in recent months."

Total industrial output has risen 0.4 per cent in the three months ended Nov. 30 from the three months ended Aug. 31 while manufacturing production volve well over a million Volares and Aspens—the vast majority of those ever built—and were needed because of possible engine-stalling has gone up 0.7 per cent between the two quarterly periods. The all-industries index in-

cludes manufacturing, mining, construction and utility activities. The index for manufacturing alone was 103.0 in November, up 0.5 per cent from a month earlier. Both indexes are seasonally adjusted and based on 1970 equals

Personal Income Up 11.1% in U.S. in Year WASHINGTON, Jan. 18 (UPI).

rose 11.1 per cent in 1977, the largest yearly gain since 1973, the government said today. The Commerce Department said the December increase was 1.1 per cent, but the gain during the final month of the year was held down by almost \$3 billion because of the nationwide coal strike which began Dec. 6. The increase for the full year

topped a 10.3-per-cent average increase in 1976, the department said, and was the largest since the jump of 11.7 per cent in

Study Used 100 Random Portfolios

Using Darts to Select Buys On NYSE Tops S&P Index

By Robert Metz

NEW YORK, Jan. 18 (NYT).-Indexing, a system by which money managers attempt to structure an investment portfolio so that its performance mirrors that of the Standard & Poor index of 500 stocks, may be one of the least rewarding investment ideas to come along in some time.

That is the implication of a recent study which attempted to determine how investors would have fared had they simply invested on the basis of tearing the stock tables out of the newspaper and throwing darts at them.

The study used a computer made to behave as though it were 100 individual investors each of whom had 25 darts to throw at the tables. The selections were random with an equal chance of hitting any stock on the New York Exchange. Each of the 100 "investors" was presumed to have thrown the darks at the close of the market on Dec. 31, 1976. An

equal number of dollars was invested in each of the 25 stocks Unlike the S & P index, then, which is dominated by the stocks of large capitalization, the "daxt" portfolios were "un-

By the end of 1977, the best of the random portfolios was up 18.9 per cent and the average portfolio showed a gain of The S & P index, meanwhile, had dropped 7.4 per

cent. The figures throughout the study have been adjusted to reflect reinvestment of all income. Robert Levy, president of Computer Directions & Advisors, who prepared the study for the New York Times, said that the most surprising result was the fact that only one of the 100

random portfolios did worse than the index. It registered a Mr. Levy also instructed the computer to chose 100 ran-

dom portfolios over several longer time periods. Over a three-year interval—Dec. 31, 1974 through Dec. 31, 1977—the average dart-selected portfolio was up 131.4 per cent while the S & P was up just 57.2 per cent . This time, all dart portfolios beat the S & P with the one in last position

registering a gain of 79.1 per cent. Over five years, the average dart portfolio was up 29.2 per cent compared with a loss of 1.5 per cent for the S & P and 96 of the 100 portfolios chosen by darks surpassed the S & P. The exercise would have had to be extended to cover a 10-year period before the average dark portfolio began to approximate the results of the S & P. Even for this long period, random selection resulted in nearly two-thirds of the

100 portfolios outpacing the index. The average random port-

folio for the period was up 49.2 per cent and the S & P, 41.5

Broad Rally Pushes Index Up 7.8 Points

Analysts Cite Hopes Of Carter Proposals

NEW YORK, Jan. 18 (Reuters).

—A combination of bargain hunting and optimism about the dollar's recent stability in foreign currency centers sent prices on the New York Stock Exchange higher today.

The Dow Jones industrial average, up 3.20 at 3 p.m., closed with a gain of 7.28 points, exactly equal to yesterday's gain,

A better showing than the blue chip indicator was made by new NYSE breadth figures, which showed gainers leading legers by . 5-to-2 margin.

The Big Board's volume totaled 21.39 million shares compared with 19.36 million yesterday. The averages weakened at around midsession after Egypt broke off peace talks in Jerusalem But additional support was traced to investor expectations that President Carter may have something constructive to say for the economy when he delivers his

Another positive signal was the government report of an 82-percent gain in December housing starts.

state of the union address tomor-

row and his economic message on

Bausch & Lomb soared 4 3/4 to 47 7/8 after a trading halt was lifted. The company said it has discussed with Revion a variety of business arrangements, including the possible merger of the two companies. Revion picked up 1/4 to 41 3/4. Superior Oil rose 12 1/2 to 259 1/2, Great Lakes Dredging 3

to 33 and Medusa 2 5/8 to 37 3/8 International Paper rose 1 7/8 to 41 3/4 after reporting better Marshall Field, the volume leader, added 1 7/8 at 32 1/4. The

company said it had no idea why the stock was up and active. Prices were also sharply higher on the American Stock Exchange,

where the index rose 0.57 to 121.19. Allied Artists, the volume lead-

er, finished up 1/2 at 2 1/2. In Chicago, the sharp downturn in soybean futures prices was halted today, although the gains were minor and scarcely put dent in the substantial losses of the past two sessions.

Soybeans struggled up 2 cents 2 bushel, while wheat and corn futures finished about steady Brazilian officials said that nearly a million acres of soybeans were destroyed by droubht.

A rainless growing season reand soybean production substantially. And a variety of adverse weather conditions more than halved Argentina's wheat production compared to 1976 output. The Agriculture Department

also said cold weather may have hurt the Soviet Union's winter grain crops.

The Scorecard. A way to trade commodities without risking a penny. It's yours free.

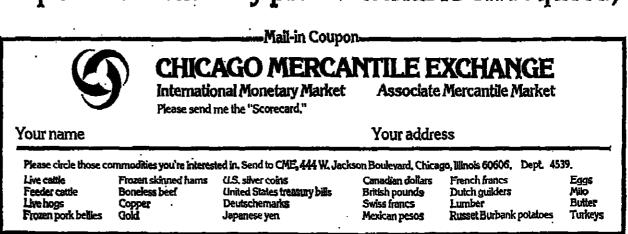

Some people who've never tried would make excellent commodity futures traders. Others would not. It takes a combination of personality factors, knowledge and skill.

Now there's a painless way to find out how successful or unsuccessful you

might be. It's our "Commodity Trader's Scorecard." You use it to practice trading, using actual daily prices quoted in your newspaper. After a few months, you ought to know whether you have a "feel" for futures trading or not. If you do, you might want to consider trying the real thing.

For your free Scorecard, call toll-free 800-243-5000. In Connecticut 1-800-882-5577. Or send in the coupon below. (Limit: one Scorecard per respondent. Quantity prices available on request.)

Metallurgist/Mining Engineer & Mining Engineer/Project Manager

The World Bank, an International organization located in Washington D.C., is currently expanding its lending activities in the mining and minerals sector in developing countries and has openings for a non-ferrous metallurgist or mining engineer with a strong background in metallurgy; and a mining engineer, with a strong background in both operations and management of mining ventures during implementation and construction.

Both positions will involve identification, preparation and appraisal of projects for Bank financing and their supervision on a continuing basis thereafter. They will, therefore, normally entail travel of between 2 and 3 months per year. Candidates should have had approximately 10-15 years' experience with mining and/or engineering companies. A graduate degree in mining engineering and/or metallurgy is normally essential although extensive, relevant on-the-job experience may substitute in certain circumstances.

For the Metallurgist's position, preference will be given to candidates familiar with up-to-date technology in both hydro and pyro-metallurgy, and those with a strong operational background, particularly in nickel and copper processing.

For the Mining Engineer's position, preference will be given to candidates with experience of both implementation and operations. Specifically, candidates should be familiar with scheduling, procurement and overall project management and should have experience of cost control, both during imple-

Although most of the Bank's work is conducted in English, a working knowledge of Spanish or French would be an Impor-tant asset for both positions. Some experience of report writing will be expected. Salaries which are competitive are determined on the basis of qualifications and experience. Benefits for all staff include 5 weeks' annual leave, health and life insurance program, pension plan and relocation expenses upon appointment.

Additional home leave and educational benefits are available to staff members employed outside their home countries.

Please send a detailed resumé quoting reference number

THE ONCE AND FUTURE STAR

By George Michanowsky, Hawthorn, 149 pp. 92

Reviewed by Boyce Rensberger.

mankind's legends and pro-But seldom has the story about any one star. save the sun, attributed to it more significant earthly effects or founded those attributions on more plausible grounds than is the case with "The Once and Future Star.'

In this short but fascinating book, George Michanowsky, a specialist in Mesopotamian astronomy, leads an armchair exploration that links outer space and ancient history in a way that the likes of Erich von Daniken and Emmanuel Velikovsky cannot. Michanowsky's story is grounded in established The stories of ancient astronauts and colliding worlds Where Michanowsky are not. speculates, he says so. With the others, you can't tell fact from fiction. Michanowsky advances what

surely must seem one of the more audacious scholarly claims in many years. He believes he has identified the one key event in nature that prompted aboriginal peoples-ancestors of the Sumerians — living some 6,000 years ago to lay the foundations of astronomy, mathematics, science and all the other educated arts upon which civilization was built. His evidence is compelling. The event, he believes, was the explosion into a supernova of a

star not far from our solar system. A supernova is the incredibly brilliant flameout of a dying star. Astronomers see many such events but only rarely does one occur close enough to the earth to be visible to the naked eye. The supernova in this case has been established by Australian astronomers as the closest to the earth known to science. It occurred less than half as far away as the supernova of AD 1006

presumed to have been far more Shining brighter than a full moon and visible day and night, the ancient starburst would have been seen from Sumer as a dazzling spot of light just above the southern horizon. Shimmering across the waters of what is now the Gulf, the supernova could not have failed to attract the attention of the Mesopotamian settlers, whose civilization is the earliest of which we have any

That such a supernova occurred in the last 6,000 to 11,000 years is not in doubt. In recent years, astronomers have discovered the supernova's remnant, its cinder. if you will, still spinning where the star died. The spinning mass still emits radio waves that pulse in time with the spin rate. Astronomers know the cinder as

BRIDGE

In the diagram, with misfitting hands, North-South struggled to three no-trump after West opened with a weak no-trump.

East-West would have been in big trouble, but North was in no position to double, an action that would have produced a hig penalty. He could not make the obvious bid of two clubs either, for that would have been conversioned in his methods, showing major suits. He tried three clubs and after showing his reluctantly permitted South to play three no-trump.

It was clear to West that he should lead a diamond. It was less clear which card he should lead, and he made the unfortunate choice of the queen. The ace won in dummy, and South led a spade to his king.

West ducked, noted that his partner had begun a high-low algual to show a doubleton, and ducked again when the declarer led his singleton chib.

The club queen won and the spade queen was led. South threw a heart, and West was in scouble when he won with the ace in this position:

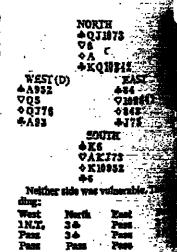

NORTH **♦**J197 ♥**8** ◆K10842 WEST East ♥109842 414 437 SOUTH VARI78 ♦ X 1082

Ali Refusing to Talk By Red Smith

Next, the Millennium:

MIAMI BEACH, Fig., Jan. 18 (NYT).- "Fair Warning," Patti Dreifuss of the promotional firm called Top Rank Inc., told a reporter over long distance, "Ali says the press is welcome at his workout but no interviews, he's not talking." "Muhammad Ali not talking?" the reporter said. What a story!"

So it came about that a covey of refugees from the Super Bowl press box showed up in the Fifth Street Gym, the seedy little sweatshop in South Beach where the heavyweight champion of the world is preparing to defend his title (they say) against Leon Spinks in Las Vegas on Feb. 15.

This was Ali's birthday. Either 36 or 37 years ago yesterday, the manchild who would be christened Cassius Marcellus Clay emitted his first infant wall in Louisville, Ky. Not in one waking moment since had he been silent, until he emerged from his dressing room here and surveyed a birthday cake that occupied about a third of the ring. The cake was festooned by a sugary crown and boxing gloves, and it bore six candles. What It Means

All is now 36 in the records-"which means," said Jerry Lisker of the New York Post, who boxed in the amateurs when All did, "that he has dropped a year since the 1959 nationals or has added one."

With mayor Leonard Haber of Miami Beach at his elbow, All cut the cake and fed a morsel to the mayor. Witnesses sang "Happy Birthday." The mayor presented All a "gold key to the championship city" and a police courtesy card. All neither

The champion's face, a full moon between fights, doesn't look natural when the mouth is closed. He looked like a stranger with the sulks. He wore a waterproof jacket with elastic at waist and wrists, and snug fiannel sweat pants from hips to ankles.

"He's about 235, 236," said Angelo Dundee, the trainer. Hell come down about 10 pounds. Hell soon have middle-age spread and never get rid of it."

It turned out that the gift of speech wasn't the only thing Ali had mislaid. Also missing were most of the camp followers who had trooped at his heels for years. Drew (Bundini) Brown wasn't here, nor Walter Youngblood, nor Gene Kilroy, nor eight or so others including the camp cook, Lana Shabasz. The only survivors today were John Ali, who has been around since the days of Elijah Muhammad, and Jeremiah Shabazz and Luis Sarria, the assistant trainer.

Welcome to the Game

Mike Dokes, a former amateur champion, got into the ring with the champion. Dokes waited in a corner, his back to the ring and his head down, and Moe Fleischer, a veteran manager, spoke from outside the ropes: "My boy, someday we'll be making

a fuss over you. Don't worry about it."

Dokes weighs about 205 but Ali made him look like a light heavyweight. Nevertheless, he moved to the attack as boldly as though he were big and famous. Through the first round, Ali was up on his toes, circling away from his attacker, grabbing Dokes and shoving him off, seldom punching,

"He lets his sparring partners bank him around," Fleischer said. "I don't understand that. When I had a guy in training, my guy was always the boss."

All took some good shots in the second round. Dokes opened the third with a hard hook to the head and Ali responded with some sharp jabs and several hooks. Late in the round he pulled Dokes's head down and spoke into his ear: "Show me a world champ. Show me!" They danced apart as the bell rang. Some Further Advice

In the fourth, Dokes banged with both hands in a neutral corner. "Pump 'em!" Ali grunted every time he was hit. "Pump 'em!" He wasn't dancing now. With each heavy breath his belly puffed out above the sweat pants. "Pump 'em!" he said, and flung Dokes halfway across the ring.

Ali keeps his mouth quiet by stuffing it.

Going to his corner, he told Dokes: "One more." "Two more," Dokes said.
"One more," the champion said.
"Ain't no excuse," he told the sparmate. "You 19, I'm 36.

This is the last round. Show me!"

They had hardly reached midring for the fifth round when Dokes pulled off his headgear and tossed it aside. It was a clear challenge: "Hit this unprotected chin." There were murmured protests from Ali's corner, but the champion loosened his own chinstrap and discarded the helmet.

Stealing the Act

Crouching, hands low, Dokes offered his chin but kept the head weaving just out of range of Ali's jab. In younger days, Ali used to put on shows like this with his brother. "You moving

Dokes rushed him into a corner and whacked his head. "Keep pumpin'," Ali said. He landed a good shot to the head and backed Dokes into the corner. Dokes held his hands high while Ali hooked to the body deliberately, one, two, three, four. Then Ali swung his man into midring for a flurry of punches All went immediately to his dressing room and after a while

Jeremiah Shabazz, a Muslim preacher, got up to tell the assembled press that Ali dearly loved the press but silence was his policy for now. Ali's wife, Veronica, walting for her husband, said she had bought him a solid gold pen, a rustcolored lounging robe and a third gift she was keeping secret.

the women have a 30-second clock

within 30 seconds of posse

By Fred Ferretti

NEW YORK, Jan. 18 (NYT).-1899 they were pantaloons and the nine players on each side of women's basketball teams were forced to root themselves in areas could either pass or shoot.

Today it is tee shirts and sateen shorts and women move freely and feint and guard with arms waving, they dribble unrestrainedly and they drive and lay up as aggressively as any Women's basketball has evolved. It is no longer a polite, pallid

imitation of men's baskethall in which feminity must be insured, but basketball, played by wom The Association for Intercollegiate Athletics for Women, which governs women's sports, says that of its 822 member schools more than 650 compete

According to the National Federation for State High Schools Association, the 14,931 high

schools that have women's sports report 388,000 participants in basketball programs. In 1971 the federation reported 294,000 women in sports programs of all kinds; today that figure stands at 1.6 million. The numbers aside, there are

other indicators of a rising interest and participation of women in basketball. Schools such as Penn State, North Carolina State, UCLA, LSU, the U.S. Military Academy, the Universities of Tennessee, Maryland and Rutgers have fielded teams to join the traditional women's basketball squads from places like Del-ta State, Montclair State, Way-

Dominion and Queens College.

Most colleges actively recruit women basketball players, and according to the womenSports Scholarship Guide, most major colleges now have baskethall scholarships for women as well as men.

aroused fan interest. At the Women's Invitational Tournsment at Madison Square Garden early this month, Delta State, national champion for the last three years, beat Montclair State, 71-58, and almost 7,000

And last March, when Delta State played No. 2-ranked Immaculata and Montclair State played Queens College, 12,336 people showed up. Louislana State's coach Jinks Coleman says, "We started out with 20 fans a game." Now his Lady Tigers play to 2,000 and "we're teaching the school about women's basketball."

"It used to be that half the crowd was men making fun of the women players." Stan Gorlick of Montclair State says. "Now it's everybody rooting for their teams." Gorlick pays tribute to Montclair State's 5-foot 10-inch forward Carol Blazejowski, who "is the equal of any man as a nure shooter," and who scored 52 points in the Garden in March. "Perhaps they haven't the speed

nor the physical size, but Carol can shoot the ball with anybody, and handle as well as anybody Maybe she could play pretty well against a good male college guard, too."

Demand for Tall Girls

Because of the increased popularity of women's basketball, recruiters now look for what they look for in men. The days of the 4-foot 11-inch guard are gone. Now colleges want women who are 6 feet or over.

Delta State's fine player, Lusia Harris is 6 feet 4 inches, and California Polytechnical from Pomona has a starting lineup of women who average 6 feet 2 inches. Says Delta State's coach. Margaret Wade, "Now there is a big demand for the taller girlseveryone will be fighting for them

Nor are the women burly types, as the male-outlined stereotypes would have it. Most are muscular, although slim simply cause they are athletes. According to Karen Johnson, executive secretary for the Association for Intercollegiate Athletics for Women, which is part of the National Association for Girls and Women in Sport, "there was a time when the woman who went out for basketball was kind of a masculine type, but that's not the case any longer.

"I expect it has to do with acceptability of women in the sport. It is highly visible and popular."

Women's baskethall is less defensive these days than in the past and this reflects an evolutionary change in the rules of

The first official rules for women's basketball were formulated in 1899 among the Ivy-influenced women's schools such as Vassar and Radchliffe. They called for nine women to a side, each confined to a particular space, and the game was restricted to passing the ball from space to space and shooting to.

It gradually became a six-woman team, with three guards who stayed at one end of the court and played only defense and movement came, Johnson says. three forwards who stayed at the other end and shot. There was en can be more mobile, so sports : relaxations followed naturally." no crossing the center line, thus making it essentially a three-on-With relaxations of the rules

three half-court game. the sport has boomed, particularly Initially, women could not dribble the ball, then gradually in the last half-dozen years, and named in 1972 when Immaculata they were permitted to dribble of Philadelphia won the title. It the ball once, actually a bounce, before passing or shooting. In the repeated in 1973 and 1974. Delta State of Cleveland, Miss., won 1950s women were allowed to dribble twice: by the 1960s it had inin 1975, 1976 and 1977. creased to three times. Now there Leagues abound and now prois no such restriction.

fessional women's basketball is taking shape, In international amateur competition, women's Gradually the three-three combination changed as well to four and two, and then about 10 years basketball is becoming a major ago a five-woman team was adopt-Although there has been wom ed, identical to the men, and all court differences died. Today the

en's basketball in Europe for at least two decades, only in the last 10 years has it acquired status. And only in the last Olympics at Montreal in 1976, was there a women's basketball competition. The American women won a silver medal as the Russians won the According to C. Robert Faul

jr. of the U.S. Olympic Committee several women's teams are in formation for the next Olympics. He says that "women's baskethall is in as many countries as there are entries and I guess that's 140. only good team in Montreal was the American women. I wouldn't bet against them."

Not if they're as good as Luxie Harris, a member of that silvermedal-winning team in Montreal, who was drafted by the New Orleans Jazz of the NBA. She declined and has since gra-Nobody doubts, least of all the women players, that more will soon be drafted. Anybody who can score 52 points in a game like Montclair State's Blazejow-

TAURANT BAR

Len Holtz stands 5 feet 10 inches, weighs about 150 pounds. was just an average football player at Kent State," said one admirer, "He was way driven him. It's a Napoleon complex. To show all these guys, the big-timers who went

Ohio State and so on, that this little guy from East Liverpool Ohio, can do anything. He's driven. Like a man posses It was back in high school at East Liverpool that Holtz first thought about coaching. But that would have meant going to college. And there was this other thing he wanted to do.

"I wanted to work in the mill," he said. "I went to college one year to please my parents, because nobody from either side of the family had ever gone before. But after the first year I didn't want to go I was going to work in back. Crucible mill."

The Root of Desire Why would a guy rather work in a steel mill than go to col-

"I had friends who worked there," Holtz said, "and they had money in their pockets to buy hamburgers and they owned a convertible car and they had a girl by their side. didn't know what more you could want in life than what

they had. So I got a job. "I labored in the open hearth. I guess it was, oh, at least the fourth or fifth day on the job before I decided I was going back to college. If you ever saw me physically, you'd understand. The work was just a little too physical for me. That was not what I wanted for the rest of my life."

He knew for sure now that he was going to coach. Some day, maybe, he'd even be a head coach at a big high school. So it was back to Kent State, where he went out for basketball and football, excelling at neither. "People ask me how it felt to be a 152-pound linebacker," he said. "I tell them, I don't know. I was never 230. But I know

it hurt.' Being as egotistical as I can be—if I really want to butter myself up-I say I was a poor football player and a poor athlete but I did play the game hard and I think my teammates respected me. I played some. I carned a letter my junior year. Then I hurt my knee in spring practice. I did not play my

Turned to Coaching Instead he helped coach the freshman team. Then, after a hitch in the service, he became a graduate assistant under Forest Evashevski at Iowa. He would later serve as an assistant under such as Rick Forzano (then at Connecticut), Paul Dietzel (South

(Obio State). Holtz was 32 when, in 1969, he got his first head coaching job, at William & Mary. After three seasons (in which he went 13-20) he moved on to North

(33-12-2 and four bowl appearances in four years). And then, after the 1975 season, a summons from the pros.

"What influenced you to go to the NFL when you were doing so well at North Carolina State?" Holiz was asked.

"Well," he said, "I think basically it was the glamor of it. And the owners of the New York Jets were most impressive people and believe in them."

The players were less impres-

sive, at least artistically. But that's not why Holtz stayed only "T can't say a negative thing about pro football," he said. "There wasn't one thing wrong with it. The thing that was wrong was with Lou Holtz. The few talents that God gave me were not made for pro football."

"Why didn't Lou Holtz fit

Nantical but Nice "Well, Lou Holtz is primarily an individual who enjoys teaching blocking and tackling because that's what you win with. get an athlete [in college] who isn't quick enough or fast enough and you have to motivate him. I can't not my feelings into words but working with an individual is like you're on a ship together you've got to sink or swim \mathbf{and}

"You don't face that kind of challenge in pro ball?"

"If you have a guy who's not quite good enough you coach him, yeah. But you get somebody else, too. You buy, you sell, you trade. Now don't get me wrong. There are some great coaches in pro-fessional football. Chuck Knox ... Landry, Madden . . . But I'm just not suited for it. I just did not feel comfortable in that environment. I think it's the

epitome of football but the few talents I have just aren't there." Some say Holtz likes to keep his players and assistants off balance and maybe that's easier in college ball. He'll drive his people like dogs, they say, but won't forget to give them an appreciative pet. "His style is to put pressure on everybody around him but then to add love,"

one observer said. "He's a great psychologist." And an accomplished magician, judging by the popularity of his

"I started doing it about 12 years ago," he said. "I enjoy entertaining people. Sometimes I'll do tricks for the squad. Sometimes when I'm out speaking." "Do you do card tricks," he was asked, "or pull rabbits out of a hat or what?

"No," he said, "Rope tricks. Tearing up newspapers and then restoring them. Things like that." What's the reception usual-"Very good," he said. "As a matter of fact, excellent."

"What's your favorite trick?"

"Probably the rope trick." "How do you do it?" Perfectly, I think, What do you think? There's no way I could explain it." Sometimes he'll hit you with a quip, they say, end sometimes with a whip. He has been described as volatile and sensitive to criticism. "He does wear himself out," one source said, "and is cross and irritable sometimes."

"How long do you work?" he was asked "From dawn till exhaustion." When does exhaustion usual-

"Oh, when dawn comes. No, it's very simple thing, actually. You do what you have to do to win. It's not work. I enjoy the problems and the challenges. It's not like you have to punch a clock. Sixteen or 17 hours a day mean nothing. Your mind is going to function anyway, so it might as well function on something constructive."

WHA Standings

Art Buchwald

'Walking Behind You'

protested.

WASHINGTON-The Los Angeles chapter of the National Organization for Women (NOW) has criticized Rosalynn Carter for following the Saudi Arabian custom of walking several feet behind her husband during his trip to the Middle

Eastern nation. The LA persons complained that Mrs. Carter should not have gone if she could not walk beside the President,

instead of bringing up the rear.
While NOW point, there is

may have a Buchwald another school of thought that says the custom of walking behind one's husband is not demeaning and has many advantages. This school, which meets in McNulty's Ber and Grill around the corner from my office. was in session late in the afternoon the day the L.A. protest story appeared in the news-

I believe it was Nolan who brought it up. "I don't think we should be too critical of Arab customs, even though they're socking it to us on the oil."

Novak agreed, "here are many advantages to a wife walking behind her husband and the American woman should examine them before she criticizes Mrs. Carter." "What are they?" McNuity wanted to know.

"Well, for one thing," Novak said, "if the wife walks behind the husband she can tell if anyone is following him."
"I'll drick to that," Doyle said.

Varieties of Flu Believed Limited

MOSCOW, Jan. 18 (UPI).-Sovict medical researchers said today they believe that last fall's reappearance of an old strain of influenza holds hope that there are only a limited number of variations of the flu virus.

The Soviet researchers said that the reappearance of the A-1 virus, active in the Soviet Union between 1947 and 1957, indicates that flu virases do not occur in infinite numbers and that four or five types of vaccine might

be enough to fight them.
"We shall probably have to revise our strategy of combating the flu. It can become much simpler," Dr. Victor Zhdanov, director of the Moscow Institute of husband if a camel is going to kucek him down," Novak con-

"But camels don't knock down husbands in America," Siegel

They don't now," Novak replied. "But they might at some future time."

"The drink to that," Doyle said again_

"Suppose it's a slushy day and cars are splashing people on the sidewalk A wife, if she's walking behind her husband, could caution him in time and he could jump out of the way," Stevens

"She could also keep he: eyes open when her husband walks under a scaffolding, and throw her body in the way in case someone accidentally dropped a brick," Novak added.

"That's true," Evans agreed. "If she was walking next to him they both might be killed. Walking behind your husband is no different than flying in different airplanes to protect the children.

Doyle raised his glass, "I'll even drank to that,"

"If the husband is up in front, and the wife is behind, she can keep an eye on him in case he starts ogling pretty girls walking the other way." Hackett said. Someone said, "And let's not

forget muggers. It's much safer for a couple to walk in tandem. Then one or the other can scream for help."

"I don't see why the NOW people are so uptight about Rosalynn walking behind her husband," Novak said. "It gave a lot of dignity to the President's trip to Saudi Arabia, and provided the press with its most newsworthy

Someone at the end of the bar chimed in, "You're right. The trip could have been a bust if the Carters walked together, especially since they had done it already at their Inauguration. What's wrong with the First Lady dollowing in her husband's foot-

I guess it was Nolan who summed it up when he said, "American women could learn a lot from the customs of Saudi Arabia. Everyone knows the only reason it's the richest country in the world is because their women walk behind their men."

Doyle was delighted with this last thought and without even making an announcement drank The last Russian czar is an Eldon League hero because of his family motto: 'Autocracy, Orthodoxy and Nationalism.' Eldonians have adopted it as one of their toasts.

U.K. Group Backs Champagne and Feudalism

By Peter J. Shaw

ONDON (UPI).-The eccentric Eldon League aims at nothing less than the abolition of the 20th century.

"Forward dato the past," urges its progressive reactionary faction. "Backwards into the future," demands its regressive reactionary wing.

The Eldon League, like the early 19thcentury lord chancellor who inspired it, onnoses all change. We believe in the feudal system,"

said Grand Imperial Prior Netl Hamilton. "We think it kept the people happier." The Edon League and the world of El-donia in which it flourishes are the creation of law student Hamilton, who launched it as an eating and drinking society, with a fair measure of spoofing mixed in, while a Cambridge undergradu-

ate in 1971. "We believe in civilized living. We've done our best to put the clock back," Hamilton said over a plate of stewed rabbit in Middle Temple Hall, where lawyers, reactionary and otherwise, have supped and debated since Tudor times.

"We want to abolish the 20th century, particularly the internal combustion engine and plastic.

Travel by Carriage

League members travel on foot or by horse-drawn carriage whenever possible.
"We are sometimes forced to compromise by using taxis," Hamilton lamented "The 18th century was the summit of civilization," he said. "The advantage of living in the past is the abolition of uncertainty, which is the catalyst of change

and adversity." John Scott, the first Earl of Eldon (1741-1838), was Britain's longest serving and most backward thinking lord chancellor, the head of the judiciary.

"He opposed reform of the penal code and all other change in 26 years as lord high chancellor, except trial by battie, which he shoulshed in 1819." Hamilton

"The league is not in favor of any change, but then nobody's perfect." He said, "When I was 14, Eldon's political creed struck a chord in me. I was visited in a dream by his spirit and from that day we never looked forward. I'm merely the vehicle for transmission of Eldon's thoughts surviving in the modern age-the corporal embodiment of his incorporeal thought."

What sets the Eldon League apart from Britain's hundreds of other eccentric groups are its public celebrations. There

is a traditional spring duel with champagne corks in London and annual high jinks at Ascot and Henley-civilized cape ing, mind you, for Edonians detest all things which are uncivilized.

Commuters on Platform 4 of the Preston, England, railroad station were recently startled by the shattering of champagne lasses buried to the floor in Russian Hamilton and about 20 other Eldomans

and intends had gathered to remember the time Czar Nicholas II breakfasted at the station builet after he arrived on the 8:45 a.m. train from Balmoral, 81 years They were morning dress and top hats and quarted Louis Roederer champagne,

which Nicholas always drank at breakfast. They are pears in white wine and mushrooms on toast, the czar's favorite morn-The last Russian caar is an Eldon League hero because of his family motto: Antocracy, Orthodoxy and Nationalism."

Eldonians have adopted it as one of their The annual champagne duel is with wellshaken bottles of bubbly at 10 paces. The goal is to take off the adversary's top hat with the cork. Each protagonist represents a differing view on a subject of current national or Eldonian concern. The winner's view is adopted as Eldonian policy and the unspilled contents of the weapon

quickly drunk, along with plenty of fresh amounition. People are far too miserable in the world today," Hamilton said. "We try to

New World Map

keep our sense of humor?

Hamilton has redrawn the map of the world on the Eldonian Projection—fiat and back to front—and named it Eldonis. It is subdivided into four great fieldoms, each of which is under the titular jurisdiction of one of the four imperial grand officers of the league.

The Edonians await "a unanimous invitation by the people of the world for good government," Hamilton said between sips f a vintage ruby port.

"People generally like to feel sub-ordinate. We are judged lunatics by all who don't agree with us but then we feel 99.9 per cent of humanity is hunstic it-

Hamilton is cagey about the number of Ekdonians-"250,000 or perhaps 30..." but if they held power, they'd like to:

 Abolish the House of Commons and all • Eliminate the present and future tenses of the English language, except for the "future-in-the-past tense, which most approximates to the Eldonian ideal."

• Restore the feudal system, "which was the first form of social security." • Halt trade "because it is the catalyst

of revolution." Forbid passports because, as the Duke of Wellington said in expressing his dislike for trains, they enable people to move around.

racy, the Queen and the monarchy," Hamilton said. "An extremely rigid class system should be greatly beneficial to human so-clety. It is the only system guaranteed to bring good government. We aim to show how inhuman democracy can be." That, so far as it goes, is the mock-

serious side of the Eldon League. The truly serious side is the good food, drink and merriment the Eldonians enjoy at their 30 or so gatherings each year.

"Membership is granted by whim and caprice," Hamilton said. "Members must we disdain for all things modern care nothing for money, detest all things which are uncivilized. They must also exhibit all the characteristics of the 18th, or even

19th, century gentleman." Eldonians socialize in frock coats, carry gold-tipped canes, dine in white tie. Although officially anti-feminist, they politely tolerate a few ladies.

Diplomatic Links

The league is represented in Hong Kong, West Germany, South Africa and Chicago. It has diplomatic links with the Republic of Minirva, an island near Tahiti visible only at low tide, and contacts with monarchist organizations in Italy and France as well as with émigré groups from Eastern European countries.

Each September Eldonians join the Charles James Fox Society in laying a wreath on Fox's statue in London's Bloomsbury Square. Fox was an 18th-century gentleman who gambled away a £250,000 fortune, worth about \$70 million today. before he was 21.

One of the Eldon League's favorite pinoricks in history went almost unnoticed. On July 4, 1978, the league sent a letter to the U.S. ambassador in London inviting the United States to rejoin the United Kingdom and promising to forgive and forget. "We then ceremonially retook the em-tassy for the empire," Hamilton said. "Unfortunately, very heavy rain at the time prevented large numbers of people seeing that historic event."

Ah, well. Carry on backward, chaps.

"I don't know what IEO means. I just want to change jobs."

Let us clarify, IEO means International Executive Opportunities, and that's a special section which appears in the International Herald Tribune. Less eloquent newspapers speak of recruitment ad-

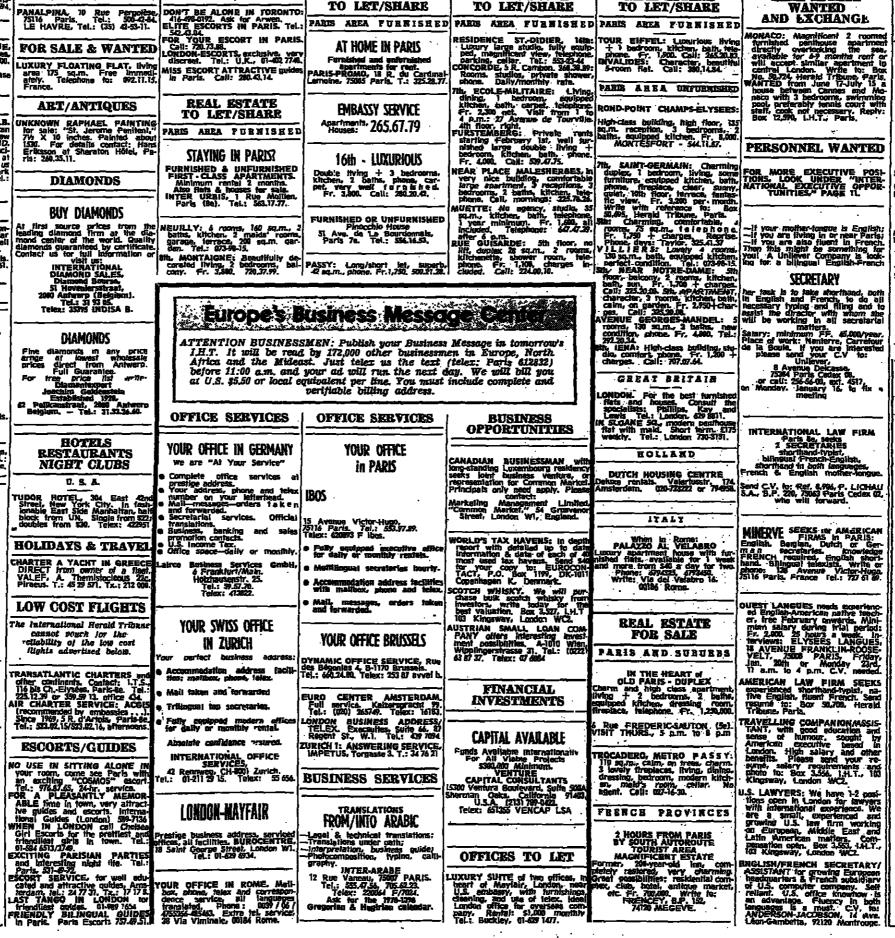

In the Herald Tribune, Europe's only international daily and the one read most by most multi-national executives, the level of positions offered is higher than that of other newspapers; interest and response are higher, too.

So if you're an executive looking for a better job, you're more likely to find it in the Herald Tribune.

If, on the other hand, you're a company seeking a qualified international executive, you're likely to be successful with an ad in the Herald Tribune IEO section. Because...

Herald Tribune ads work.

Call Max Ferrero at 747 12 65 in Paris or your local Herald Tribune representative for more information.
